Over-expenditures not Recognized by Audit Office.

AUDIT OFFICE, OTTAWA, April 17, 1906.

SIR,—Inclosed please find a statement of over-expenditures by the Public Works Department for 1905-6, as shown by the books of this office, up to April 12, 1906.

This statement does not include any letter-of-credit cheques which may have been drawn after March 31. Allowance has been made for $100 over-expenditure, covered by a general vote for that purpose.

——	Vote.	Exp. to April 12	Overdraft over $100.

Please draw no more cheques on these accounts until supplementary estimates are voted.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, April 17, 1906.

SIR,—Inclosed please find, for the information of the Treasury Board, a statement of over-expenditures by the Public Works Department for 1905-6, as shown by the books of this office, up to April 12, 1906.

This statement does not include any letter-of-credit cheques which may have been drawn after March 31. Allowance has been made for $100 over-expenditure, covered by a general vote for that purpose.

* * * * * * * * *

(Same list as shown in previous letter to Public Works Department).

* * * * * * * * *

I am asking the deputy minister to draw no more cheques on these accounts until supplementary estimates are voted.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, April 19, 1906.

DEAR SIR,—I have the honour to acknowledge the receipt of your letter of the 17th April in reference to certain appropriations given to this department, where the amount has been somewhat exceeded in the expenditure.

In this connection I may say that steps have been taken to cover the excess in question by votes to be applied for in the supplementary estimates for the current year,

which are shortly to be laid before Parliament. I may also say generally that in most cases the expenditure made was absolutely necessary and could hardly be avoided.

Yours very truly,

The Auditor General. A. GOBEIL, *D.M. P.W.*

AUDIT OFFICE, OTTAWA, May 17, 1906.

SIR,—Let me acknowledge receipt of your application No. 728 for $205,530.23 in favour of the Bank of Montreal, to repay letter-of-credit expenditure by Messrs. Gobeil and Kingston during April, 1906.

Of this amount, the following sums are in excess of the Parliamentary Votes (including the $100 margin) :—

Ottawa buildings—Repairs	$ 3,504 02
Rideau Hall, including grounds	1,212 50
Dominion Quarantine Stations	588 94
Heating Dominion Buildings ($359.01 + $8.20)	367 21
Lighting Dominion Buildings	4,596 20
Harbours generally—Quebec	246 23
Laprairie ice piers	110 00
River Ottawa—Masson wharf	46 34
Midland Harbour (Advertising)	28 20
Dredge vessels—Repairs	1,499 05
Surveys and inspections	365 15
L. and C. Tel. lines, lower St. Lawrence, &c	4,884 07
Graving docks	1,356 82
	$ 18,804 73

Please subtract these sums from the application, returned herewith, as I do not now see my way clear to passing them.

Your attention is directed to my letter of 17th April, which gave a list of over-expenditures up to March 31, and which ended as follows :—'Please draw no more cheques on these accounts until Supplementary Estimates are voted.'

I am, sir, your obedient servant,

Deputy Minister, Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, May, 18, 1906.

SIR,—Inclosed please find, for the information of the Treasury Board, a copy of a letter written yesterday to the Public Works Department, on the subject of over- expenditures.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, May, 25, 1906.

SIR,—I beg to acknowledge receipt of your letter of the 17th May, in reference to the reimbursement to the bank of payments made under our Departmental Letter-of-Credit for April, 1906.

When you come to look over the matter, you will find that, after all, there are only six instances of any consequence. All the others, which go to make up a pretty long list, are for small amounts. In this connection, I may say that there is not one of those amounts paid by this department in excess of the vote which is not covered by a

vote included in the supplementary estimates for the current year, now before the House, although not yet passed. The department had therefore a moral certainty that the excess of expenditure would be met when the accounts would be adjusted at the end of the fiscal year.

As regards your letter of the 17th April and note at the end of it, I beg to say that I am informed by the accountant that we have already conformed with your request, and that we have made no overdraft in connection with any of the expended appropriations which were mentioned in that letter.

Yours very truly,

The Auditor General. A. GOBEIL, *D.M. P.W.*

Public Works Dept.: Pay Lists of Extra Clerks.

AUDIT OFFICE, OTTAWA, August 30, 1906.

SIR,—In connection with the examination of the pay-lists of temporary employees in the Public Works Department:

For September and following months, please attach to the pay-lists the reports of the officers who have charge of the attendance-books.

It does not appear probable that the present signers, Messrs. Gelinas, Ewart, Arthur St. Laurent, &c., are able to certify from personal knowledge, with their time so fully taken up by larger duties.

The certificates we need are always those of officers who are familiar with the details which they certify. Superior officers may 'approve for payment.'

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPARTMENT, OTTAWA, Sept. 28, 1906.

SIR,—I beg to acknowledge the receipt of your letter dated 30th August ultimo, having reference to the presence sheets of this department. In answer, I beg to state, for your information, that the method of time-keeping in the department is by means of a book in which the employees of all branches of the department are obliged to enter their names upon assuming their duties in the morning and at the hour of leaving in the afternoon. This work is entrusted to a special officer in the secretary's branch of the department, and at the end of each month an extract is made for every branch of the department which is submitted to the chief thereof, whose duty it is to explain the reason of all absences so as to enable the officer in question to prepare a definite pay-sheet for the Audit Office. As no special officer is entrusted with the checking of the pay-sheets for the respective branches, I fear that with the present method in the department I am unable to supply your office with the reports mentioned in the second paragraph of your letter. I need not add that anything we can do to help out the work of your office in connection with the above will be done with the greatest pleasure.

I am, sir, your obedient servant,

FRED. GELINAS, *Secy.*

The Auditor General.

AUDIT OFFICE, OTTAWA, September 29, 1906.

SIR,—Let me acknowledge receipt of your pay-lists for temporary employees for September, 1906.

The pay-list of the Secretary's Branch contains the name of an employee who must have been absent during the whole month, within the knowledge of any average reader of the Ottawa newspapers.

The certificate signed by Secretary Gélinas is: 'I certify that the undermentioned employees have been at this office or on outside duty every day for which payment is asked, except Sundays and Statutory Holidays as per following statement: from Aug. 28 to Sept. 27, 1906.....Fred. Gélinas.' The name in question is credited with 31 days in the column headed 'At office, including Sundays and Statutory Holidays.'

Either Mr. Gélinas is certifying in ignorance of the facts,—in which case he is not the officer required by my letter of Aug. 30, 1906, namely, one 'who is familiar with the details which he certifies.'

Or else Mr. Gélinas is certifying a mis-statement, with cognizance of the facts.

The pay-list of the Secretary's Branch is returned herewith. Please remove from it any names whose attendance does not satisfy the plain wording of the heading.

It is to be noticed that I do not enter into a discussion on the merits of any individual item. If the objections can be removed in any legal way, no difficulty will be raised in this office.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, NOV. 5, 1906.

SIR,—I beg to apologize for not having replied sooner to your letter of the 29th September, *re* certificates of attendance and referring particularly to the absence of one of the officials of the department which, you state, was generally known and should not have been ignored by the certifying officer.

In reply, I beg to state that those certificates are generally given after a schedule is made, by the officer in charge, of the number of days during which employees are present, such information being gathered from the attendance books. The name of the employee to whom you refer happened to go by mistake in the statement and was not at the time noticed by the Secretary. The latter, however, when later on he was called upon to sign the cheques, noticed the error and rectified it by declining to sign that particular employee's cheque and returning it to the Accountant.

I could not for a moment consider the possibility of such a fact as the certifying by one of the officers to a voluntary mis-statement.

I have renewed my instructions to the officials in charge to be more than ordinarily careful about those certificates.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.*

Travelling Expenses: F. Gélinas.

(Following the correspondence at pages V—371 and 372, of 1904-5.)

PUBLIC WORKS DEPT., OTTAWA, February 16, 1906.

SIR,—With reference to your letter of the 22nd April concerning some items in the accounts of Mr. Gélinas for travelling expenses, I beg to state that shortly after the letter was received, I issued instructions to the Secretary that all accounts for similar disbursements and services should be brought to me for examination before payment, in order that I might scrutinize them in the direction of the remarks of your letter. I may say that the division of the expenditure to which you call attention has been made in subsequent vouchers.

With regard to cab-hire, I may say that the Secretary of the department has charge not only of his personal cab-hire, which may be quite small, but also with that which is required for the department generally and which could not be charged to any special officer. When any conveyance is required for general service the item is charged to the Secretary and the departmental expenditure appears on his personal account.

Concerning the fact that the travelling of the Secretary was mainly in an easterly direction from Ottawa, I may say that that may be a coincidence, but I am in a position to state that all the trips, for which a charge was made against the department, were undertaken on public business.

As regards the request made in the last paragraph in one of your predecessor's letters asking for a categorical declaration from Mr. Gélinas, I may say that Mr. Gélinas has given in the annexed memo. the certificate asked for, and which is in addition to the ordinary certificate attached to each voucher of a similar nature.

I inclose a memo. received from Mr. Gélinas in the matter.

I have the honour to be, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M. P.W.*

PUBLIC WORKS DEPT., OTTAWA, April 27, 1905.

Memorandum for the Deputy Minister.

I have read most carefully the Auditor General's letter, dated the 22nd instant, and bearing upon the subject of my travelling expenses and cab-hire in Ottawa city during 1903-4, and from July 1 to October 31, 1904, and beg respectfully to submit:—

1. As to the Auditor's remarks on the charges for letters, telegrams and telephones, this is the first intimation I have from the Audit Office that these charges should have been shown separately at the exact amounts expended. Ever since I entered the public service, eight years ago, my accounts have always been made in the form and wording of those mentioned in the Auditor's letter, and a request of this nature was never before made to me by the Auditor General. The details of the sums were copied from memoranda slips kept by me day by day and which, unfortunately, are no more in my possession, as I never expected they would be required by the office of the Auditor General. It would be now rather difficult from memory to give the information required by Mr. McDougall, and the result of such a work would not give satisfaction, as the calculations would be but approximate. In future, I will see to it that each item for letters, telegrams and telephones is kept separate and that the exact amounts expended in each case are mentioned.

The Auditor intimates that some of those charges are rather heavy. To this I shall only submit that a glance at the rates charged for long distance and pay-station telephones and also for telegraphic messages would easily show that an average of from $3 to $3.50 per day is in no way exaggerated.

2. Cabs and street cars. The remarks above mentioned also apply to these charges, and in this case I must add that these items are not only for my own expenses but also cover messages in different parts of the city of Montreal by the messengers of the department in the Montreal post office, on public business always. As to the Auditor's remarks, 'The two classes of outlay should be kept separate,' I may state that nearly all of the amounts of these items is for cab-hire, the proportion for street cars not exceeding daily, in all, about 50 cents. 'Cab-hire should be itemized.' I repeat what was stated, that every cent of this expenditure was noted day by day at the time it was made, and were the memoranda above mentioned in my possession, they would be handed to the Auditor without hesitation. I can only repeat that in future, as in the case of letters, telegrams and telephones, I shall have separate amounts entered for every item of expenditure under this heading.

Cab-hire in Ottawa—To the Auditor's request for information as to whether 'street cars could not have been used as efficaciously,' and whether 'tariff rates were paid,' my reply is no to the first and yes to the second question. Whenever and wherever street cars could be used instead of cabs this was done—as it is done at present, at my own expense, to expedite the work of my office. The use of cabs was resorted to more especially in cases of illness, and it must be borne in mind also that a goodly portion of this expenditure was incurred not only by myself personally, but pretty largely by messengers and other officials on departmental business. The accounts were

in all cases presented to me for certification, and this is probably the reason why the charge appears against me personally.

I believe the above to sufficiently explain the method of the calculations by which I established the amounts to be paid for each day.

At the Auditor's request, and notwithstanding my having given on every voucher filed in the Audit Office the usual certificate 'The whole of this expenditure incurred on government business,' I do now make the most categorical declaration that all the sums charged in my accounts for travelling expenses were duly spent.

The only reply I can make to the remark of the Auditor General as to the frequency of my trips to Montreal is, that official duties called for my presence there oftener than at other points of the country.

All of which respectfully submitted,

FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, March 14, 1906.

SIR,—Let me acknowledge receipt of your letter of February 16, concerning the travelling expense accounts of Mr. Secretary Gélinas.

Mr. Gélinas gives the following explanation of the large amount of cab-hire: 'It must be borne in mind also that a goodly portion of this expenditure was incurred not only by myself personally, but pretty largely by messengers and other officials on departmental business. The accounts were in all cases presented to me for certification, and this is probably the reason why the charge appears against me personally.'

None of the vouchers classed under Mr. Gélinas' cab-hire contained the name of any other official.

It might be well, when certifying in future, to make sure that the accounts record fully all the circumstances of importance.

Please have the charges for 1905-6 corrected in this sense, if necessary.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., OTTAWA, March 16, 1906.

SIR,—I beg to acknowledge the receipt of your letter of the 14th instant concerning the accounts of Secretary Gélinas for travelling expenses, and I must say that, as regards further certificates, I will act in accordance with the desires expressed in that letter.

I am, sir, your obedient servant,

A. GOBEIL, *D.M.P.W.*

The Auditor General.

AUDIT OFFICE, OTTAWA, April 3, 1906.

SIR,—A deposit-receipt has come to hand, for $281.60, credited to 'Casual Revenue, 1905-6,' and endorsed with the following explanation: 'Repayment by F. Gélinas of portion of expenditure of 1904-5 (Departmental Contingencies):

Telephones, telegrams and letters (under travelling expenses)	$128 85	
Cab-hire at Ottawa	152 75	
		$281 60

Please send a detailed account, showing the manner in which these sums were calculated.

The letter from this office dated April 22, 1905, discussed the charges of 1903-4, as well as those of 1904-5. What progress has been made towards adjusting any overcharges of 1903-4, and previous years?

Your attention is called to the second-last paragraph of Mr. Gélinas' letter of April 27, 1905 (transmitted to this office Feb. 16, 1906) which reads as follows: 'I do now make the most categorical declaration that all the sums charged in my accounts were duly spent.'

At what date did the necessity for a refund become obvious to you? Was it after Feb. 16, 1906, the date of your letter of transmission?

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

Audit Office Should Receive Orders in Council for Contracts.

AUDIT OFFICE, OTTAWA, March 16, 1906.

SIR,—Let me acknowledge receipt of your application No. 655, for $18,270, in favour of Kelly Bros., Mitchell (Limited), being estimate No. 1 on their $434,500 contract for construction of Vancouver public building.

Your attention is called to subsection 2, section 1, of chap. 32, 4-5 Edward VII., which reads as follows: 'Whenever, in the case of any work, tenders are required to be, or are, invited, the Minister shall submit all tenders received therefor to the Governor in Council, and the contract for the work shall be awarded under the direction of the Governor in Council.'

Please arrange that copies of such Orders in Council shall be furnished to this office in all cases, including the present instance.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

James Trodden: Balance of Claim.

(Following the correspondence at Pages 404 to 408 of 1904-5.)

AUDIT OFFICE, OTTAWA, August 24, 1906.

SIR,—I am passing to-day your application No. 49, for $5,513.38, in favour of James Trodden, being balance of his claim for work on reconstruction of telegraph line between Ashcroft and Quesnel, in November and December, 1900.

The amount is calculated as follows:

Reconstruction of line, lump sum.	$14,000 00
Less: actual outlay paid on Mr. Trodden's certificates.	8,486 62
Balance now claimed by Mr. Trodden.	$ 5,513 38

Previous correspondence on this subject shows that the Audit Office has always considered the $8,486.62 as being all which the Dominion should be called on to pay, in addition to Mr. Trodden's wages ($610) and expenses; and we are not yet convinced otherwise. It is still believed here that, had Mr. Charleson's records been kept as complete as they should have been, this claim could not have been maintained.

However, with the scanty material now available, it is no longer thought advisable to prolong the discussion; and the special vote of parliament is accepted as final.

Your attention is called to the wording of the Supply Bill: 'Ashcroft-Barkerville Line: To pay James Trodden amount due him on work performed, $5,513.38.'

Parliament would naturally be disposed to vote money which was clearly due. But had the estimates referred to the dispute with this office as to whether the money was due or not, it is possible that closer inquiry might have been made before the vote passed.

In future similar instances, where parliamentary authority is sought for payments otherwise unauditable, please submit the wording to this office for concurrence.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

West Block Extension: Geo. Goodwin.

AUDIT OFFICE, OTTAWA, August 24, 1906.

SIR,—Let me acknowledge receipt of your application No. 982 for $10,800 in favour of Mr. George Goodwin, being estimate No. 5 for 'West Block Extension.'

The wording of the estimate is 'work done and materials delivered, from the beginning of the work to June 30, 1906.'

In view of the history of this contract, I would like to have a special certificate, that no part of the fallen work is included in the present estimate; and that future estimates will contain only standing work, in addition to materials delivered

The papers are returned herewith, for completion in the direction indicated.

I would like to be favoured with a perusal of the report of the Commissioners who investigated the fall of the tower.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

AUDIT OFFICE, OTTAWA, August 31, 1906.

SIR,—Let me acknowledge the return from your department of application No. 982 for $10,800 in favour of Mr. George Goodwin, being estimate No. 5 to June 30, 1906, for 'Extension to Western Block.'

The new certificate (of August 30) by Chief Architect Ewart is: 'Having reference to the accompanying letter from the Auditor General, asking for certificate to the effect that no part of the work in connection with the fallen tower is included in the amount of $10,800 in favour of Mr. George Goodwin, I have to state that the estimate does not contain any item of work connected with the rebuilding of the tower in question.'

In my letter of August 24, the paragraph asking for a further certificate reads as follows: 'In view of the history of this contract, I would like to have a special certificate that no part of the fallen work is included in the present estimate; and that future estimates will contain only standing work, in addition to materials de-delivered.'

Mr. Ewart's statement is altogether different from the certificate asked for by me.

Until I see the report of the Commissioners it is difficult to speak positively, but from present appearances, the 'rebuilding' is the part which we can pay; the 'fallen work' we cannot pay.

As Mr. Ewart's certificate is worded, it may be that we are paying for all the fallen work, while Mr. Goodwin is to replace it without charge.

The two methods will give the same result when the work is finished; but the first is the safer in the meantime.

The papers are returned herewith for speedy action, as the accounts of 1905-6 will be closed to-day. Please ask the Chief Architect to certify as described in my letter of August 24.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., OTTAWA, August 31, 1906.

Memo. re West Block Extension.

Having reference to the accompanying letter from the Auditor General, asking for certificate to the effect that no part of the work in connection with the fallen tower is included in the amount $10,800 in favour of Mr. Geo. Goodwin, I have to state that the estimate does not contain any item of work connected with the rebuilding of the tower in question or the fallen work. The payment asked for on account is for carpenter, plaster and other work. All the work included in the contract, except the tower, is virtually completed.

D. EWART, *Chief Architect.*

AUDIT OFFICE, OTTAWA, Sept. 10, 1906.

SIR,—Let me acknowledge receipt of letter No. 158955 from your department, enclosing a copy of Mr. Ewart's certificate of Aug. 31, concerning Mr. Goodwin's work on 'West Block Extension.'

Chief Architect does not certify as asked.

Mr. Ewart adds to his former certificate so that it now reads: 'The estimate does not contain any item of work connected with the rebuilding of the tower in question or the fallen work. The payment asked for on account is for carpenter, plaster and other work. All the work included in the contract, except the tower, is virtually completed.'

This is not a satisfactory variation of the form required in my letters of Aug. 24 and 31, for the following reasons:

Progress Estimates are not Conclusive Settlements.

From Mr. Ewart's remark that 'The payment asked for on account is for carpenter, plaster and other work,' I gather that he proposes to allow previous progress estimates to stand, although part of the work in them has fallen.

The previous estimates have not this strength; they fall with the work. They were only methods of calculating approximate payments. Each progress estimate can represent only the structure as in existence at its own date.

Report of the Special Commissioners.

My letters of Aug. 24 and 31 asked that I be favoured with the perusal of the Commissioners' report, assigning (I understand) the liability on Mr. Goodwin. This report has not yet been forwarded to me.

New Progress Estimate needed.

Please have estimate No. 5 (returned herewith) recast in several columns, as follows:

A. That part of Mr. Goodwin's work, included in previous estimates, which remains standing.

B. The work which is now reported for the first time, and which is not connected with the fallen part.

C. Any fallen work which the department may put into the estimate.

D. The cost of rebuilding.

Information should have been given earlier.

The progress estimate might have been expected to show all the points described above.

The questions asked on the 24th of August should have been answered explicitly at once, without modification.

Mr. Ewart's new certificate of August 31 should have been sent to me earlier than September 7.

Please explain to Mr. Goodwin that these delays are not chargeable to the Audit Office.

Liability of the Government.

Please let me have a copy of whatever opinion you may have obtained from the Department of Justice as to the government's liability in the present instance.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

DEPT. OF PUBLIC WORKS, OTTAWA, Sept. 14, 1906.

Referring to the accompanying letter of the 10th instant, from the Auditor General *re* progress estimate No. 5, in favour of Mr. Geo. Goodwin, contractor for the Western Block Extension, which estimate amounts to $10,800, I beg to state that the estimate referred to does not include any part of the fallen work; it was prepared without any reference to previous estimates, and contains only items of work now standing.

D. EWART, *Chief Architect,*

The Secretary, Dept. of Public Works.

Mr. Ewart explains orally that $4,000 will complete the work, and that more than that is held.—F. H., Sept. 15.

Georgian Bay Canal Survey: Board Paid at Headquarters.

AUDIT OFFICE, OTTAWA, September 1, 1906.

SIR,—Let me call your attention to two sub-vouchers in 1905-6 expenditure on 'Georgian Bay Canal Survey.' as follows:

Madame J. F. deM. Gingras, Ottawa East:

82693:	board, June 28 to July 13, 1905: 16 d. at $2.	$32 00
84822:	board, Sept. 2 to 26, 1905: 23¾ d. at $2.	47 50

These are described in the summary as 'Gingras' board,' Mr. E. Gingras being the assistant engineer on the Geodetic Levelling party.

As the headquarters of this party will presumably be found at Ottawa, any living expenses at Ottawa should be borne by the officers themselves, since the Government pays living expenses only when they are away from headquarters.

The same remark applies to sub-vouchers 80905 and 84822, for $62.50 and $67.50, respectively, rendered by the Rideau Hotel, Ottawa, for board of Messrs. Paul Lagacé, Paul M. Lagacé, F. Belanger and J. E. Leclerc, of the same party, between July 1 and 13, and September 2 and 27, 1905.

Please obtain refunds of all these sums.

It is to be noticed that Engineer Challoner's charge for September board was struck out before payment.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., OTTAWA, November 13, 1906.

SIR,—With reference to your letter of the 1st November, concerning the payment of two sums, aggregating $79.50, for board for Assistant Engineer Gingras, during June and September of 1905, I beg to inform you that at the time this matter was being discussed, it was thought that, as Mr. Gingras was not a resident of Ottawa, there was a difference between his case and that of Mr. Engineer Challoner, to whom board allowance was not granted. Since that time, however, this matter has been discussed between the officers of this department, and although the cases of Messrs. Challoner and Gingras are somewhat dissimilar, still it is thought advisable not to treat them differently. I have, therefore, given orders to the accountant to procure a refund of the allowance made in the case of Mr. Gingras.

As regards the other men mentioned in your letter of the 1st September, I beg to state that those parties are not from Ottawa. They were hired in the province of Quebec when the Challoner party of engineers were surveying for precise levelling, and when the party in question were called upon to proceed further west to do precise levelling for the Georgian Bay Canal Survey, it was thought advisable to continue the employment of the men already engaged, as they were experienced with the work, which required particular knowledge of the instruments, &c., utilized on the work.

The same men have, therefore, remained attached to the party and have continued to work with it up to the present time, when they are engaged in completing work in the neighbourhood of Montreal. There cannot be any doubt that these men, not being residents of Ottawa and when being in Ottawa are hundreds of miles from the point at which they were engaged, are entitled to receive, while in Ottawa, an allowance for board such as they receive when outside of the city.

I trust that you will agree that the position of the men to whom I refer is quite different from that of the engineers who have their headquarters in Ottawa when not engaged in outside work.

I may further add that, possibly, in refusing to allow board to Mr. Gingras and Mr. Challoner, full justice is not given to them, inasmuch as they were not in the position of engineers who return to Ottawa, after their outside work is performed, to draft their plans and make their reports, but were actually carrying on their usual outside work in and around Ottawa, doing the outside measuring, levelling and triangulation necessary for their work. There was such a difference between their cases and that of the other engineers that, at first, it was thought that an allowance was clearly due, and I am not sure that in not allowing anything to Messrs. Challoner and Gingras for board allowance I am not treating them more harshly than the circumstances warrant.

Believe me, sir, yours very truly,

A. GOBEIL, *D.M.P.W.*

The Auditor General.

Georgian Bay Canal Survey: Re-adjustment of Account.

AUDIT OFFICE, OTTAWA, August 21, 1906.

SIR,—Let me call your attention to two payments to Chas. Harding, of Pembroke, for photographs supplied to the Georgian Bay Canal Survey.

Voucher 83137 for $47.50, paid in Sept., 1905, reads: 'Nov., 1904: photos, 96 of 5 x 7-in. at 20c., 38 of 6½ x 8½-in. at 35c.; 4 days' services and negatives, $15; total $47.50.' This voucher is certified, 'Work performed, goods received, prices fair and just; approved, E. J. Rainboth, District Engineer.'

Voucher 94984 for $44, paid in March, 1906, reads: 'Nov., 1904: photos, 96 of 5 x 7-in. at 50c., 38 of 6½ x 8½-in. at 75c.; 4 days' services and negatives, $15; total $91.50; less paid on account, by cheque 83137, $47.50; balance $44.' This account is

marked, 'Certified correct, prices fair and just, work performed: Geo. L. Griffith, Sectional Engineer.'

Please let me know whether the account for $91.50 was approved by Mr. E. J. Rainboth, the division engineer, before payment. If so, his certificate should be on the voucher.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., OTTAWA, Aug. 30, 1906.

SIR,—I beg to acknowledge receipt of your letter of the 21st instant, calling attention to two payments covered by vouchers Nos. 88137 and 94984 for photographs supplied to the Georgian Bay Canal Survey, and to state that the matter will receive due attention.

I am, sir, your obedient servant,

FRED. GELINAS, *Secretary.*

The Auditor General.

Kingston Military Buildings: Addition to Stable.

AUDIT OFFICE, OTTAWA, January 13, 1906.

SIR,—Let me acknowledge receipt of your application No. 495 for $2,200 in favour of David S. Booth, being estimate No. 2 on 'Stable for Field Battery at Kingston Military Building.'

The amount of $2,200 is calculated as follows:

Estimate No. 2 on $5,980 contract for stabling..	$4,414 50	
Estimate No. 1 on $6,993 contract for additional stabling..	3,479 00	
Drawback, 10 p.c. on $7,893.50..	.....	$783 50
Paid before..	.....	2,760 00
Present application..	.....	2,200 00
Balance held..	.....	2,150 00
	$7,893 50	$7,893 50

The contract for $5,980 is endorsed 'Lowest Tender, Public Advertisement.' We do not, however, find any information on record here as to the manner of inviting competition on the $6,993 contract. Please have this defect remedied.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., OTTAWA, Feb. 14, 1906.

SIR,—Referring to your letter of the 13th ultimo, relative to our application No. 495 for $2,200 in favour of David S. Booth, being estimate No. 2 on stables for Field Battery at Kingston military buildings, I beg to state that the $6,993 referred to in your communication is an extension of the original contract. I may explain that after the contract for the stables first called for had been awarded and the work proceeded with, the Militia Department asked that an extension be constructed to accommodate a greater number of horses than was first provided for. Mr. Booth, the con-

tractor, was asked to submit a price for this extension, and his offer of $6,993, being considered reasonable, was accepted.

I am, sir, your obedient servant,

FRED. GELINAS, *Secretary.*

The Auditor General.

AUDIT OFFICE, OTTAWA, Feb. 23, 1906.

SIR,—Let me acknowledge receipt of your letter of Feb. 14, 1906, concerning the progress estimate of David S. Booth, for stables for Field Battery at Kingston Military Buildings.

You say: 'After the contract for the stables first called for had been awarded, and the work proceeded with, the Militia Department asked that an extension be constructed to accommodate a greater number of horses than was first provided for. Mr. Booth, the contractor, was asked to submit a price for this extension; and his offer of $6,993, being considered reasonable, was accepted.'

The application now in hand for $2,200 will be released ; as, with $2,760 paid before, it will probably not exceed the work by this time done on the original contract of $5,980. The payment is to be taken on account.

You do not appear to have supplied the Audit Office with a specification of the $6,993 addition. Please remedy this defect.

Inferring, however, from the main items in the progress estimates (which are the same for each contract), namely:

Lumber, flooring, sleepers, joists, rafters, posts, clapboards, &c., 105 M ft. at $25	$2,625 00
Cedar posts, 240 at 30c	72 00

it seems probable that the addition is to be of the same size as the building originally contemplated. Extras should be only minor accessories; they should not equal the main work in size.

Please let me know whether it would not be feasible, in future similar instances, to ask for competition, as prescribed by the Public Works Act. If it is desirable that the addition should be constructed by the first contractor, that result would (in general) be obtained automatically, since the contractor on the ground could afford to make a lower bid than an outsider.

I would like to have this subject fully discussed before another estimate is presented.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

AUDIT OFFICE, OTTAWA, July 20, 1906.

SIR,—Let me call your attention to the Auditor General's letter of Feb. 23, 1906, on the subject of Mr. D. S. Booth's estimate for stables for Field Battery at Kingston Military Buildings.

To the original contract for $5,980 there had been added an extra of $6,993 for an addition to the stable as first contemplated.

Mr. Fraser's letter of Feb. 23 ended as follows: 'Please let me know whether it would not be feasible, in future similar instances, to ask for competition, as prescribed by the Public Works Act. If it is desirable that the addition should be constructed by the first contractor, that result would (in general) be obtained automatically, since the

contractor on the ground could afford to make a lower bid than an outsider. I would like to have this subject fully discussed before another estimate is presented.'

No answer has yet been received to the letter from which the preceding quotation is made. Please give the matter early attention.

I am, sir, your obedient servant,

FREDERICK HAYTER, *for A.G.*

The Deputy Minister of Public Works.

CHIEF ARCHITECT'S OFFICE, OTTAWA, July 31, 1906.

Referring to the accompanying letter from the Auditor General, dated 20th instant, as to addition to stable for 'B' Battery, erected by D. S. Booth at Kingston.

The contract work of the original stable was being proceeded with at the date that the Department of Militia asked for the addition thereto. This addition had to be proceeded with at once; and as the new work would require to be built into the original building, the demolition of a portion of the work done under the original contract would be unavoidable; and this might not be done by any other than the contractor, until his contract work was completed and accepted by the department.

The contract provides that the department may at any time, either before or during the construction of the works, order the contractor to proceed with any changes, additions, &c., that may be considered expedient, whether such changes increase or diminish the work to be done or the cost of doing the same.

D. EWART, *Chief Architect.*

The Secretary, Public Works Dept.

AUDIT OFFICE, OTTAWA, August 10, 1906.

SIR,—In further discussion of Mr. D. S. Booth's estimates for Field Battery Stables at Kingston Military Buildings, namely: Original plan $5,980, and addition of same size $6,993:

Mr. Fraser's letter of Feb. 23, 1906, ended as follows: 'Please let me know whether it would not be feasible, in future similar instances, to ask for competition, as prescribed by the Public Works Act. If it is desirable that the addition should be constructed by the first contractor, that result would (in general) be obtained automatically, since the contractor on the ground could afford to make a lower bid than an outsider.'

Chief Architect Ewart's memorandum of July 31, 1906, says: 'The contract work of the original stable was being proceeded with at the date that the Department of Militia asked for the addition thereto. This addition had to be proceeded with at once; and as the new work would require to be built into the original building, the demolition of a portion of the work done under the original contract would be unavoidable; and this might not be done by any other than the contractor until his contract work was completed and accepted by the department.'

It would be well to profit by this item of experience, and prepare such a modification of the contract form as would enable the government to make similar alterations to their own property in the future—by accepting such limited portions of a work as might be required to effect the changed purposes, and thus relieving the contractor of subsequent responsibility for such accepted parts.

Was this offer made to the contractor in the present instance? Apparently it would be his interest to agree with such a proposition—except for its weakening his monopoly.

I am, sir, your obedient servant,

FREDERICK HAYTER, *for A.G.*

The Deputy Minister of Public Works.

CHIEF ARCHITECT'S OFFICE, OTTAWA, Oct. 2, 1906.

The enclosed states 'original plan, $5,980 ; and addition of same size, $6,993.' This is not correct, the additional stable was the same size, but in addition to the stable there was a building connecting the two stables, thus making them into one building. As regards part of the report, 'If it is desirable that the addition should be constructed by the first contractor, that result would (in general) be obtained automatically, since the contractor on the ground could afford to make a lower bid than an outsider,'—I do not hold this opinion. Contractors might tender below the value of the work, relying on the possibility of being able to raise objections and claims if not allowed to conduct the work according to their own views.

As regards profiting by their experience and preparing a modification of the contract form, this is a matter beyond my ken.

D. EWART, *Chief Architect.*

The Secretary, Public Works Dept.

Sault Ste. Marie Post Office: Extra Claim for Stone.

AUDIT OFFICE, OTTAWA, April 3, 1906.

SIR,—Let me acknowledge receipt of your application No. 681 for $10,325.80 in favour of McPhail, McCarty & Wright, for balance of their final estimate for construction of Sault Ste. Marie post office.

In addition to the original contract price of $54,000, there is the following extra item : 'Extra cost per yard, for the substitution of stone from new quarry (instead of stone specified) 485 cubic yds. at $7.20, $3492.'

Please send copies of the correspondence relating to this change. The rate of $7.20 should be certified explicitly, as 'fair and just,' by the chief architect.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

CHIEF ARCHITECT'S OFFICE, OTTAWA, May 7, 1906.

Memorandum re stone for Sault Ste. Marie public building.

Before the specification for the building was prepared a report regarding the stone was prepared by Jos. Cozens, surveyor, Sault Ste. Marie, who forwarded a sample of the stone. The following is an extract from his report:—

'Distance from post office, one mile.
Thickness of beds, 6-6.
Largest block yet quarried, 4 feet 6 inches x 4 feet 6 inches.
Quarry is being worked.
No difficulty in getting quantity.
Almost any dimension can be had.

This information was considered very satisfactory and a sample of the stone from the quarry referred to was exhibited with the plans and specifications at the time of tendering.

Mr. Jas. Thomson, the local architect, in charge of the work, reported March 25, 1904, as follows:—

'The sample of stone sent to the department and which was exhibited at the time the contract was figured was obtained just outside the town limits at what, at that time, was thought to be a quarry. Later developments have proved it to be nothing more than a pocket and I am convinced that the contractors are right in their contention that "neither the quality nor quantity can be obtained there."'

D. EWART, *Chief Architect.*

The Deputy Minister of Public Works.

AUDIT OFFICE, OTTAWA, May 16, 1906.

SIR,—Let me acknowledge receipt of your letter of May 10, enclosing copies of correspondence on the subject of 'Extra Cost of Stone from New Quarry,' for Sault Ste. Marie post office.

The following is a statement of the case, as understood here, after perusal of the documents now supplied.

Specification for Local Stone.

The wording of the specification for this item is: 'The whole of the stone throughout building (except external steps and landings) is to be of the best approved quality of local stone equal to sample, or other approved stone of equal quality.'

The specification is dated August, 1902; and the contract was signed November 23, 1903.

In November, 1903, the contractors (Messrs. McPhail, McCarty & Wright) obtained this agreement from W. Wilks & Co.: 'This is to certify that we the undersigned do agree to supply gray stone according to sample furnished to post office at $4 per yard, delivered in Sault Ste. Marie: W. Wilks & Co.'

Correspondence between Local Architect and Chief Architect.

Under date of March 25, 1904. Architect James Thompson of Sault Ste. Marie, who acted as inspector for the new post office, reported to Chief Architect Ewart as follows: 'The sample of stone sent to the department, and which was exhibited at the time the contract was figured, was obtained just outside the town limits at what, at that time, was thought to be a quarry. Later developments have proved it to be nothing more than a pocket, and I am convinced that the contractors are right in their contention (that neither the quality nor quantity can be obtained there). The mottled stone sent you recently is, I am satisfied, the only stone available; and I understand that, to secure it, the contractors have had to purchase a piece of farm lands about eight miles from town, and open a quarry.'

On March 30, 1904, Chief Architect Ewart wrote to Local Architect Thompson as follows: 'I have noted what you say with regard to the sample of stone exhibited at the time of tendering for the contract (that it was obtained just outside the town limits, and it was thought to be a quarry; later developments proving it to be nothing more than a pocket). It seems to me that contractors tendering on such a work would have ascertained whether the necessary stone could be obtained there before submitting a tender. The specification calls for the best approved quality of local stone equal to sample, or other stone of equal quality. Therefore, if the stone has to be got from about eight miles in the neighbourhood, I consider that such is local stone.'

On August 14, 1905, Local Architect Thompson, after rehearsing the previous facts about the 'pocket,' went on to say: 'The claim of the contractors, as I understand it, is the additional cost of stripping and quarrying stone at the latter place, and the additional cost of delivering it eight miles as against less than one mile. It was commonly reported on the street that the contractors were losing heavily on the stone part of their contract, and I am quite prepared to believe that such was the case. As to the legal side of the claim, of course I have nothing to say, and know moreover that must be judged by higher authorities; but if the claim is a just one, then I am convinced that the amount is not excessive.

Chief Architect's Report to Minister.

On January 17, 1906, Chief Architect Ewart reported the transaction to the Minister, with this addition: 'The contractors have transmitted a tender from W. Wilks & Co., dated Nov., 1903, offering to supply gray stone according to sample supplied for the post office, at $4 per yard delivered in Sault Ste. Marie. Mr. Thompson,

our architect, reports that there were 485 yards of stone used, and that it cost $12 a yard, which is a reasonable price for stone of the quality used in this building. The contractors claim that it cost them $3,880 more to build the building with the stone of which it was built than it would have cost if built with the stone specified and exhibited when the tenders were invited; and they ask to be paid this sum.'

Then comes a calculation of 485 yards at $8, equal to $3,880; a deduction of $375 for sundry expenses, leaving $3,505; and a division of $3,505 by 485, giving a rate of $7.20 a yard. Finally, 485 yards at $7.20 equals $3,492, the amount of the application.

In this report to the Minister, Mr. Ewart omits any reference to his own previous ruling, that the eight-mile stone came under the specification as 'local stone.'

Opinion of Auditor General.

I think that the stone from the eight-mile quarry comes under the specification clause on page 6, namely: 'The whole of the stone throughout building to be of the best approved quality of local stone equal to sample, or other approved stone of equal quality.' The contractors must, therefore, be held to the amount of their competitive tender.

Information Delayed by Public Works Department.

Claims of this nature are always discussed by the Audit Office; and the full correspondence should be sent here along with the original application. It should not be retained in the department until asked for by this office. Please see that complete information is sent in all future cases.

Courses to Pursue.

The disputed item might now be made the subject of a separate application, namely, $3,492, to be held for consideration by the Treasury Board or Parliament. The balance of $6,833.80 will be examined without delay.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., June 2, 1906.

SIR,—I beg to state, in connection with your letter of the 16th May, concerning extra cost of stone for the Sault Ste. Marie public building, that I have referred the papers in the matter to the Department of Justice.

I am, sir, your obedient servant,

A. GOBEIL, *D.M.P.W.*

The Auditor General.

PUBLIC WORKS DEPT., OTTAWA, May 25, 1906.

SIR,—I beg to refer to you herewith correspondence which has taken place between the department and the Auditor General's office, with reference to an extra payment made to the contractors for Sault Ste. Marie post office, in connection with extra cost of stone supplied for that building. I inclose:—

1. The first letter of the Auditor General on this matter;
2. The explanatory statement from the Chief Architect;
3. Copy of the contract and specifications;
4. The letter from the Auditor General of May 16, giving his ruling that the extra cost in question is not due to the contractors, and that they must be held to their original tender.

I have the honour to ask that you will kindly tell this department whether the position of the Auditor General is well taken; or whether, under the contract as explained by the Chief Architect, the extra amount is due and payable to the contractors.

I have, &c.,

A. GOBEIL, *D.M.P.W.*

The Deputy Minister of Justice.

DEPARTMENT OF JUSTICE, OTTAWA, June 9, 1906.

SIR,—I have the honour to acknowledge receipt of your letter of the 25th ultimo, with respect to claim made by the contractors for the Sault Ste. Marie post office, for extra payment in connection with the extra cost of stone supplied for the building.

The specifications provide as follows with respect to the stone to be used:—The whole of the stone throughout the building (except external steps and landings) to be of the best approved quality of local stone equal to sample, or other approved stone of equal quality (page 6).

It appears that the sample of stone exhibited was obtained from a deposit close to the town, and that there was some reason to believe that all the stone required could be obtained from this deposit, which, however, turned out to be no quarry, but merely a pocket. The contractor seems to have arranged with the owners for delivery of stone at $4 per yard, delivered in Sault Ste. Marie. When it was found that the supply could not be obtained from this source, the contractors were driven to obtain it elsewhere; and the stone used in the building was taken from a quarry which they purchased some eight miles from the town. The extra cost to them from this cause was something over $3,000.

An opinion is asked as to whether this extra cost is payable to the contractors.

I am of opinion that it is not. The contractors have, in respect of the stone, done no more than the contract provided for, namely, furnished and used for the stone work a local stone of approved quality. The fact that they had to pay more for it than they anticipated is not a matter for which the government is responsible. There was, so far as appears, no warranty that the stone required could be obtained from the supposed quarry.

The work being just what was contracted for, there is no case for a claim on the ground of extra work or changes, such as are contemplated by clause 5 of the contract; and if such a claim were advanced, it would be defeated also by the want of compliance with the requirements of that clause.

I have, &c.,

The Deputy Minister of Public Works. E. L. NEWCOMBE, *D.M.J.*

(Note by the Auditor General, December 11, 1906: This claim of $3,492 has not yet been paid.)

Glace Bay, C.B.: Dominion Coal Co.

(Following the Correspondence at Page 390 to 393 of 1904-5.)

PUBLIC WORKS DEPT., March 5, 1906.

SIR,—I have been directed by the Minister to call your attention to a matter which has been the subject of some discussion between your predecessor and myself, namely, a payment of $11,430 upon an estimate rendered by the resident engineer in favour of the Dominion Coal Company for work at Glace Bay, N.S.

Your predecessor's letters in reference to the matter are of the 5th December, 1904, and the 20th March, the 18th, 21st and 28th July, 1905.

My own letters are respectively dated the 6th February, the 6th March, the 19th and 26th July, 1905.

Apparently the point upon which the then Auditor General required elucidation from this department was in reference to what he considered to be absolutely a railway work in the contract entered into with the Dominion Coal Company, apart from what appeared to him to be purely departmental work and in the public interest.

Your predecessor seemed to think that the harbour work, that is to say, the construction of the pier and dredging was all that pertained to public expenditure, and that the balance was purely work for the coal company, for which the government could not be called upon to make any disbursements.

In former correspondence, I tried to assure him that parliament had been fully informed by the Minister of the nature and object of the work in question, plans and specifications of the work having been laid on the table of the House, as is recorded in 'Hansard' of the period.

In this connection and in further discussion of this matter, I beg to state that in the month of May last the department obtained from the resident engineer, within whose district is Glace Bay, an additional report in reference to this contract, and also that in the month of September last I had an occasion to have an interview at Glace Bay with the manager of the Dominion Coal Company, Mr. Duggan, at which interview this matter was fully gone into.

In his report to Resident Engineer Millidge, Mr. Taylor, his assistant, estimates the cost of the work required at Glace Bay at $34,000, leaving therefore $9,000 to be contributed by the company towards that work, as the appropriation as well as the consideration of the contract were only $25,000.

After having described the work, which consisted of wharf improvement along the harbour front, dredging inside and outside the harbour, a railway approach and the construction of a trestle, the assistant engineer states: 'While the public would use and derive great benefit from the works embodied in the two foregoing items (wharf improvement and dredging), they would also derive hardly less benefit from the erection of trestle and necessary railway approach thereto.'

Here it may perhaps be better to quote verbatim from the engineer's report, and I subjoin a complete quotation which will explain to you the circumstances connected with the work and the reasons why, although it might at first sight have appeared to your predecessor that on account of its name, the railway approach, etc., appeared to be purely railway work, it was none the less considered as much of a harbour work as the wharf construction and the dredging themselves:—

'The following brief explanation of the purposes of this whole undertaking may make this clearer.

'There are between 35,000 and 40,000 inhabitants within four miles of Glace Bay. Almost nothing in the way of food stuffs is produced in this vicinity, necessitating the importation of all such supplies for this large population. The great bulk of this resultant traffic reaches Sydney by water during open navigation and also by rail at all times, thence to Glace Bay over the Sydney and Louisburg Railway at a high short haul freight rate, which means a corresponding increase in the cost of living at Glace Bay and vicinity.

'In order to induce direct water transportation of these commodities and others to Glace Bay, with a corresponding reduction in price of same, return cargoes must be provided for vessels entering this trade.

'In order to provide these return cargoes, and as a benefit to this large and very important community, the Dominion Coal Company were approached by the federal, local and civic representatives with a view to the installation of an adequate coal shipping plant for the purpose of loading vessels bringing in produce, etc.

In consideration of the benefits that their employees (who, with their families, form the great bulk of this large population) would derive from the fulfilment of this proposition, and provided that certain government aid could be secured, the Dominion

Coal Company expressed their willingness to move in the matter. The result is the agreement, etc., dated Oct. 19, 1904.

'You will, therefore, perceive that no one part of these works is complete or of much benefit without all the others, and that the public would derive almost no benefit whatever if the coal pier and pocket and the necessary railway approaches, etc., were not constructed.' Signed, Jas. J. Taylor.

As I have above stated, I had the pleasure of an interview with the manager of the company last sumer, while in Glace Bay, and I must say that in the course of our conversation, Mr. Duggan expressed himself quite emphatically as regards the delay brought by the department in the payment of the work already executed by them, and about the distinction which was sought to be made between what was thought to be purely harbour work and what was deemed to be railway work.

The manager desired me to understand that any work connected with the railway was not at all required by his company, and that unless the department would decide to abide by its contract with the company, the work would not be continued. He stated to me that the construction of the railway approach and wharf was not at all needed for transportation; that it was only required in order to procure to vessels bringing produce and supplies to the town of Glace Bay such return cargoes in coal as would justify them of visiting the harbour. All the transportation required for coal was at the hands of the company, and no sea transport at that point was looked for by them. The whole work was absolutely and purely in the interest of the public, of the town and of the harbour, and it was enough that, in order to provide the advantages in question, the company was abandoning its vested proprietary right in the harbour, making it a public one, and was contributing out of its own exchequer the sum of $9,000, this latter sum being the cost of the works over and above the appropriation given by the government.

There is no doubt, I believe, that from the report of the engineer above quoted, and from the remarks made to me by the general manaegr that the works in question would never have been undertaken by the company in their own interest, but that what was in view at the time was the re-opening of the harbour, the offering of means of a new access for supplies, &c., to the town by procuring return cargoes for the vessels which would visit the harbour, and that all the works comprised in the contract entered into with the company should be considered as works for the advantage of the public and not for the personal good of the Dominion Coal Company.

Under the circumstances, I fully believe that your office would be justified in releasing the certificate issued by this department in December, 1904, for the sum of $11,430.

I am, sir, your obedient servant,

A. GOBEIL, *D.M.P W.*

The Auditor General.

AUDIT OFFICE, OTTAWA, March 9, 1906.

SIR,—Let me acknowledge receipt of your letter of March 5, 1906, on the subject of the Dominion Coal Company's estimate for work at Glace Bay.

You give references to five of Mr. McDougall's letters, but discuss only the first four. His last communication (that of July 28, 1905) raised a different objection from the others, and was as follows: 'The estimate No. 1, now in hand, is for $11,430 on account of a vote of $25,000. The $25,000 can only be paid, I think, when the work is completed, or when completion is within reach. When the whole construction (as specified) is so far advanced that $25,000 will more than finish it, we can then begin to make payment, always holding back enough to complete the work if the company should fail. Please have a new estimate prepared in this sense.'

It will be seen that, after the last explanations given in the House of Commons, Mr. McDougall withdrew (in the present instance) his objections against the incom-

plete wording of the vote. The general principle is, however, still maintained, that works of an unusual class should be specially described in the Supply Bill.

The following letter, addressed to the Minister of Public Works, and dated Oct. 25, 1905, is on our files, though not mentioned in your list: 'Sir,—With reference to our recent conversation *re* the Dominion Coal Company's work at Glace Bay, N.S., enclosed please find a copy of Mr. McDougall's letter to your department, dated July 28, 1905, which is the latest document on our records. Mr. McDougall thought that it was necessary to guard against any slight chance of the company failing to complete the contract. It is quite possible that the work has now progressed to such an extent as to modify the opinion held by Mr. McDougall. I presume your officials could give me a statement of how the work stands at present. Your obedient servant, (signed) J. Fraser, A.G.'

The application, belonging to the fiscal year 1904-5, was returned to your department when that year closed.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

(Enclosure.) PUBLIC WORKS DEPT., OTTAWA, June 13, 1906.

SIR,—With reference to former correspondence, as regards work done by the Dominion Coal Company, Limited, in connection with the construction of harbour improvements at Glace Bay, N.S., I beg to send you herewith a statement transmitted to me by the company, showing that the work done by them to the 31st March last in the said harbour is to the value of $19,433.94.

The certificate in question, as you will notice, is signed by Engineer Donkin, of the company, and countersigned by our own resident engineer, Mr. E. G. Millidge.

I hope this will be sufficient to enable you to pass the application now before you.

A. GOBEIL, *D.M.P.W.*

The Auditor General.

GLACE BAY, C.B., CANADA, May 4, 1906.

THE DEPARTMENT OF PUBLIC WORKS, OTTAWA
TO THE DOMINION COAL COMPANY, LIMITED.

Statement of actual work done by Dominion Coal Company, Limited, to March 31, 1906, for improvements in the harbour of Glace Bay, Province of Nova Scotia :

10,000 cubic yards grading at 55 cents	$ 5,500 00
18,400 lineal feet round logs at 12½ cents	2,300 00
9,950 lineal feet filler pieces at 10 cents	995 00
1,623 cubic yards stone at $2.10	3,408 30
6,930 lineal feet piles at 15 cents	1,039 50
20·5 M. spruce planking at $20	410 00
7⅓ M. squared timber at $22	159 50
6·3 tons drift bolts at $60	378 00
5 mooring posts at $15	75 00
Amount of account rendered November 25, 1904	$ 14,265 30
Hire of tug and dredge, 4,672 cubic yards dredging	4,637 00
Material for girders to cross Main St. with railway tracks	294 19
Shop work done on girders	237 45
	$ 19,433 94

Above is a true and accurate statement of the work performed in connection with the rebuilding of wharf and approach in Glace Bay harbour, the quantities of material being actual measurements, and the prices set opposite being the actual cost to this company. Hiram Donkin, engineer, Dominion Coal Company, Limited.

Work performed, materials delivered, certified, prices fair and just, certified correct, E. G. Millidge, resident engineer.

AUDIT OFFICE, OTTAWA, June 16, 1906.

SIR,—In further discussion of the Dominion Coal Company's estimate of $11,430 for work done at Glace Bay harbour, up to September 30, 1904 :

The engineer's estimate of the total cost of the contemplated work was $34,000; and the amounted voted by parliament is $25,000. The sum to be paid by the company is therefore $9,000; and general principles demand that this should not be the latest part contributed.

The discussion is advanced materially by the receipt of the document now forwarded by you, namely, an estimate of work done up to March 31, 1906, amounting to $19,433.94, certified by Engineers Donkin and Millidge.

An application for $10,433.94 will be recognized here at once, without further delay. Another application might be made for $9,000, to be charged to the 1905-6 vote of $25,000, and in favour of 'Glace Bay Suspense Account;' this sum to be released to the Dominion Coal Company in 1906-7 when further progress estimates are presented.

The difference between $19,433.94 and $25,000 will need to be revoted, unless more work is done in June.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, June 18, 1906.

SIR,—Continuing the discussion about Glace Bay harbour and the Dominion Coal Company.

My letter of June 16 ended as follows: The difference between $19,433.94 and $25,000 will need to be revoted, unless more work is done in June.'

You will of course understand that 'materials delivered' up to June 30, and included in a June estimate, can be paid out of the $25,000 vote, if the resident engineer certifies that they are a necessary part of the construction.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Public Works.

NOTE by Auditor General.—$18,089.02 was paid to the Dominion Coal Co. on an estimate up to June 30, 1906. (See page V—181 of this Report.)

Redbank, N.B.: Damage by Dredging.

CHATHAM, N.B., June 12, 1905.

SIR,—I have received your letter No. 1914 of April 29, enclosing correspondence in reference to a claim made by Mr. Simpson of Redbank, N.B., for alleged damage resulting from dredging operations carried on last summer by the Department of Public Works.

Mr. Simpson's property fronts the south shore of the North-west Miramichi for a distance of about 80 rods. The natural channel follows close to his shore, but as it was filled up at this point many years ago with mill refuse and mud, vessels in descending the river have been crossing a sand bar to a blind channel on the north side which gives good water down stream.

Dredging was first attempted across the bar, but it was found that the cut was quickly filled with drifting sand. To make a more permanent channel, it was necessary to follow the curve of the south shore and a cut was therefore made (60 ft. wide) with its centre about 60 ft. to 130 ft. from the high water line.

John Simpson has been getting a yearly rental of about $12.50 for the use of his shore for mooring rafts, his shore being very convenient to the north west boom. The river boat now runs close to his shore and its use for this purpose is thus prevented. For the loss of the income from this source in particular he desires compensation.

He has also leased a fishing privilege in this part of the river for at least 40 years, and his nets when set stretch 180 feet from shore. His fishing will now be inconvenienced and his catch possibly decreased through the same cause.

I consider that $300 would be fair compensation for the loss of revenue and inconvenience which he suffers.

Yours obediently,

The Chief Engineer, D.P.W. (Sgd.) GEOFFREY STEAD, *Resdt. Engr.*

AUDIT OFFICE, OTTAWA, August 25, 1906.

SIR,—Let me acknowledge receipt of your application No. 974 for $300 in favour of John Simpson of Redbank, N.B., for damages claimed to have been caused to his property by dredging in the Miramichi river.

From Engineer Geoffrey Stead's report, I infer that the dredging was all in the direction of restoring a previous natural channel. If so, Mr. Simpson's claim for damages would not be clear. Have you consulted the Department of Justice on this point?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

DEPT. OF JUSTICE, OTTAWA, October 11, 1906.

SIR,—I have the honour to acknowledge receipt of your letter of the 20th ultimo (159267) and enclosures, relating to the claim of Mr. John Simpson to compensation for damages caused by dredging operations carried on by your department in the Miramichi river. The Governor in Council has by order in council authorized the settlement of this claim by the payment of $300, but the Auditor General points out that the dredging seems to have been all in the direction of restoring a previous natural channel in order to the improvement of the navigation of the river; and if so, suggests that the opinion of this department be obtained before compensation is paid.

In reply, I beg to state that the fact to which the Auditor General calls attention does not, in my opinion, in the circumstances of the present case, so far as these are to be gathered from the papers, affect the right of the claimant to compensation if he otherwise would have such a right. The bed of the river seems to have been in its present condition for a great many years, and the filling up of the channel opposite the claimant's land appears from the report of your engineer to have been, in part at least, the result of natural causes. The engineer states that 'the natural channel follows close to his (claimant's) shore, but as it was filled up at this point many years ago with mill refuse and mud, vessels in descending the river have been crossing a

sand-bar to a blind channel on the north side which gives good water down stream.' From the claimant's statements it appears that the condition of the bed when the dredging was undertaken may have been as described by the engineer for as long a period as forty years, though there is no definite evidence as to the length of time.

In such case I do not think the old natural channel can be restored, as a public work, without giving rise to claims to compensation under the Expropriation Act in otherwise proper cases.

So far as the work prevents the use of his property for the mooring of rafts, as he had theretofore been accustomed to use it, and thereby diminishes the value thereof, I think he has a valid claim to compensation.

As to the other branch of his claim, it appears that he has or had really no private fishery and no lease or license from the provincial government, and there can be no right to compensation in respect of injury in that regard. All that he produces in connection with his claim so far as the alleged fishery goes is a license from the Dominion government to use a net in front of his property, dated in 1896, and which, he says, has been renewed to date. He has had the full benefit of this license, whatever it amounted to, and if in the present condition of the river the net can no longer be used or cannot be used to advantage all he need do is to drop the license.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. E. L. NEWCOMBE, *D.M.J.*

Godfroye River: Claims for Re-dredging.

AUDIT OFFICE, OTTAWA, August 10, 1906.

SIR,—Let me acknowledge receipt of your application No. 32, for $4,929.75 in favour of Antoine St. Pierre, for dredging at Port St. Francis and Godfroye river in August, September and October, 1905, as follows:—

Port St. Francis, October 23 to 25, 1905 ($324)—	
Sand, stone and clay: 2,160 c.y., at 15 cents.	$ 324 00
Godfroye river, August 28 to October 21, 1905 ($4,605.75)—	
Sand, dredged and towed away: 11,665 c.y., at 15 cents. .	1,749 75
Sand, dredged and cast over: 10,880 c.y., at 11¼ cents. . . .	1,224 00
Sand, re-dredged and towed away: 10,880 c.y., at 15 cents. .	1,632 00
	$4,929 75

Engineer Michaud describes this dredging and re-dredging as having taken place, but he gives no explanation for its necessity. Please have this omission rectified at an early date.

The papers are returned herewith, as they contain Mr. Michaud's original report.

The payment of $3,888 in 1904-5, made without public tender on account of being under $5,000, was for dredging between July 17 and August 26, 1905. The item now in hand, of $4,605.75, being work from August 28 to October 21, is a continuation of the previous dredging, without a break, and brings the total up to $8,493.75. The exception for contracts under $5,000 is, therefore, not available in the present instance.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

RESDT. ENGINEER'S OFFICE, MONTREAL, August 17, 1906.

SIR,—In obedience to your letter No. 3462, of the 14th inst., inclosing copy of a letter from the Auditor General with regard to the dredging done at Port François and Godfroye river, and asking me to give the required explanation as to the necessity of having re-dredged some of the materials and paid for same.

I beg to inform you that the water being too low to float the scow along the dredge, the only possible way to perform the work was to cast over the material of the first cut, which was afterwards scowed away.

If you refer to a letter of Mr. E. B. Godwin to me, dated December 1, 1905, you will see that after the consultation with the chief engineer, it was decided to allow 75 per cent to Mr. St. Pierre of the quantity of material cast over.

On February 22, last, I wrote to Mr. E. B. Godwin informing him that the quantity of material cast over was 10,880 cubic yards, on which a reduction of 25 per cent on the contract price (15 cents) makes a total reduction of $408. I also informed him that Mr. St. Pierre would accept that reduction. I hope these explanations shall be satisfactory.

Yours obediently,

The Chief Engineer, Public Works. J. Ls. MICHAUD, *Resdt. Engr.*

AUDIT OFFICE, OTTAWA, August 31, 1906.

SIR,—Let me acknowledge receipt of your letter No. 293839, of August 28, inclosing a report of Resident Engineer Michaud, on the subject of dredging performed by Mr. Antoine St. Pierre, at River Godfroye.

As shown in my letter of August 10, the progress estimates contain the following two items:—

Sand, dredged and cast over: 10,880 c.y., at 11¼ cents..	$1,224 00
Sand, re-dredged and towed away: 10,880 c.y., at 15 cents..	1,632 00

My letter of August 10 went on to say: 'Engineer Michaud describes this dredging and re-dredging as having taken place, but he gives no explanation for its necessity. Please have this omission rectified at an early date.'

Mr. Michaud's report of August 17 says: 'I beg to inform you that, the water being too low to float the scow along the dredge, the only possible way to perform the work was to cast over the material of the first cut, which was afterwards scowed away.'

Persons tendering are supposed to be familiar with the locality; and Mr. St. Pierre took all risks of this kind when he signed the contract.

The application No. 32 of 1906-7 is returned herewith. Please deduct from it the sum of $1,224, for 'overcasting 10,880 c. y., at 11¼ cents.'

You have not discussed the last paragraph of my letter of August 10, 1906.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(Note by Auditor General, December 11, 1906: The claim of $1,224 has not yet been paid.)

Sorel Wharf: McAuliffe, Poupore, Malone & Weddell.

AUDIT OFFICE, OTTAWA, January 13, 1906.

SIR,—Let me acknowledge receipt of your application No. 552 for $25,000 in favour of McAuliffe, Poupore, Malone & Weddell, for extra dredging at Sorel deep water wharf. The calculation is as follows :—

Slopes of 4-to-1, instead of 2-to-1, 27,652 cubic yards at 25 cents.... ....$	6,913 00	
Extra depths of 9 inches, 47,400 c. yds. at 25c.	11,850 00	
Silting, 63,166 cubic yards at 25 cents..	15,791 50	
Held at present....		.....$ 9,554 50
Application....		..... 25,000 00

Order in Council necessary.

For additional allowances of this magnitude, outside of the strict provisions of the contract, it would be preferable, I think, to obtain the authority of the Governor in Council. Please have this arranged.

Calculations and Diagrams would be of use.

I would like to be supplied with detailed calculations of the quantities involved, and diagrams in elucidation of them. As these are of course on file in your department already, the delay will be only that necessary for copying.

Silting might perhaps have been anticipated

Against the payments for extra slopes and depths, I am not at present prepared to make any objection. But unless the contract time was greatly extended, to suit the government and not the contractor, the silting might have been foreseen by all the tenderers, and it would not now be a matter for additional compensation.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

MONTREAL, April 5, 1906.

SIR,—I beg herewith to return files No. 286735 and 277478 regarding claim for extra dredging at Sorel by Messrs. Poupore, McAuliffe & Co.

In connection with paragraph No. 2 of the memorandum, I submit copies of the diagrams and calculations upon which was based my report of February 11, 1904, and a separate calculation of the difference in cubic yards between slopes of 2-to-1 and slopes of 4-to-1.

This quantity of 27,655 cubic yards was unforeseen excavation, as the slopes might in ordinary material reasonably be expected to stand at 2-to-1.

The time limit was twelve months from signing the contract, a very short time for work covering such an area as this one did.

The delays were granted to suit the contractors. It is, however, only fair to take into account that the extraordinary freshet of December, 1901, occurred within the limit set at first for the completion of the work, also that the dredging was practically completed in the fall of 1903, so that the period to be considered is only that from June 25, 1901, to November, 1903.

I am, sir, your obedient servant,

The Chief Engineer, Public Works Dept. L. G. PAPINEAU, *Resdt. Engr.*

PUBLIC WORKS DEPT., OTTAWA, April 20, 1906.

SIR,—With reference to your letter of the 13th January last, in regard to our application No. 552, for $25,000 in favour of Messrs. McAuliffe, Poupore, Malone & Weddell, for extra dredging at the Sorel deep water wharf, I beg to inclose herewith copy of a report from our engineer which contains the information desired by you.

As regards the paragraph of your letter concerning the obtaining of the authority of Council, I beg to inform you that steps are being taken in the direction suggested by you.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, April 30, 1906.

SIR,—Let me call your attention to correspondence on the subject of McAuliffe, Poupore & Co.'s claim for extra work at Sorel Deep Water Wharf.

Under date of Jan. 13, 1906, a letter was written from this office, of which the following was an item: 'I would like to be supplied with detailed calculations of the quantities involved, and diagrams in elucidation of them. As these are of course on file in your department already, the delay will be only that necessary for copying.'

Resident Engineer reported on April 5 (nearly three months later): 'I submit copies of the diagrams and calculations.'

The Secretary's letter of April 20, reads: 'I beg to inclose herewith copy of a report from our engineer, which contains the information desired by you.

Please obtain an explanation of the delay of the Engineer's Branch in reporting, between Jan. 13 and April 5.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, August 30, 1906.

SIR,—In further discussion of the claim of Messrs. McAuliffe, Poupore, Malone & Weddell, for extra dredging at Sorel Deep Water Wharf:

My letter of January 13, 1906, asked that an Order in Council be obtained, before making the payment. Has this yet been done? If so, please see that a copy is sent to this office.

Since the extensions of time were granted to suit the contractors, there can be no claim under this head, for an allowance for silting; and this item might be removed from the application, which is returned herewith.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, December 1, 1906.

SIR,—Let me call your attention to my letter of Aug. 30, 1906, and previous correspondence on the subject of claims by Messrs. McAuliffe, Poupore, Malone & Weddell, for extra dredging, &c., at Sorel Deep Water Wharf.

I would like to be informed whether you have referred this matter to the Department of Justice. If so, please send me a copy of any opinion which may have been obtained from that department.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., Ottawa, Dec. 10th, 1906.

SIR,—In reply to your letter of the 1st December and your note of the 7th, I beg to state that, on the 12th July last I referred the matter of Messrs. Poupore, Weddell & McAuliffe, together with the correspondence with your office, to the Department of Justice, from whom I have had no reply to date.

I am asking Mr. Newcombe to-day to kindly advise me on the matter as you are pressing for some information in order to include it in your report, which is now in the printer's hands.

Believe me, yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

(NOTE by Auditor General, December 11, 1906: No payment has yet been made on this claim.)

Goderich Harbour: Damage by Storm.

AUDIT OFFICE, OTTAWA, August 24, 1906.

SIR,—Let me acknowledge receipt yesterday of your application No. 992, for $12,175.97 in favour of Messrs. Battle & Conlon, being for 'balance on contract as per arbitrators' report,' in connection with improvements at Goderich harbour.

The claim appears to be based entirely on loss occasioned by a storm of unusual severity.

Fiscal Year 1905-6 now Closed.

The application, which is marked as chargeable to 'Goderich harbour improvements' of 1905-6, is returned herewith, since the votes of 1905-6 all lapsed on August 15, and further payments cannot now be made from them.

Special Vote Needed, to Waive Contract.

Your attention is called to section 20 of the contract form, namely: 'The contractors are to take upon themselves the entire risk, and to be answerable for all accidents and damage of any kind which may occur during the performance of the works, whether risk from storm or otherwise.'

Since the government is not liable under the contract, payment can only be made after explicit authorization by Parliament.

If you decide to include a special item in the estimates for the November session to pay Messrs. Battle & Conlon, will you kindly let me see the draft before it is printed?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(NOTE by Auditor General, December 11, 1906: No payment has yet been made on this claim.)

Meaford Harbour: Award to M. A. Pigott.

AUDIT OFFICE, OTTAWA, June 1, 1906.

SIR,—Let me acknowledge receipt of your application No. 770 for $75,939.28, in favour of M. A. Pigott, being 'amount awarded in full settlement in connection with contract' for works of improvement at Meaford harbour.

The papers attached convey no information as to the reasons why the final estimate under the contract is not conclusive.

Please forward the full correspondence, including the evidence taken before Messrs. Gobeil, Lafleur and Brophy.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

OTTAWA, March 15, 1904.

SIR,—We have the honour to submit to you herewith our report following our investigation of the claim preferred by Mr. Pigott against the Department of Public Works, in connection with the construction of certain works of improvement in the harbour of Meaford, province of Ontario.

This matter has been referred to us upon the understanding that the investigation would be made, not upon the interpretation of the contract and of its restrictive clauses, but in order that we might arrive at a reasonable and equitable valuation of the work done by Mr. Pigott, the said valuation being established on the sworn information contained in the evidence brought forth during the inquiry.

The claimant has submitted (see appendix herewith 'A'), a bill of claim, itemized from No. 1 to No. 44, inclusively, amounting to the total sum of $246,498.24.

Inquiry was made by us into every one of the items claimed, and care has been taken to obtain under oath the most accurate information concerning each portion of the claim.

We submit, in appendix 'B,' a list of the awards which, after much consideration, we believe reasonable and advisable to make in connection with this work.

The total of our award is $138,603.83, a sum total which, we believe, represents the value of the work done by Mr. Pigott at Meaford.

Out of that total amount are to be deducted the sums already paid to Mr. Pigott—or for him—amounting to $72,440.89, which would leave a balance payable to him, on account of this work, of $66,162.94.

We may further observe that in none of the items of the award made by us, is included any profit for the contractor.

We fully believe that this report and its recommendation contains a full measure of justice to the claimant, and we beg therefore to recommend that the sum of $66,162.94, with interest from the date of the final estimate (July 31, 1902), be offered, and, if accepted, be paid to Mr. Pigott in full and final settlement of all his claims connected with the execution of the works done by him at Meaford, province of Ontario.

Respectfully submitted,

A. GOBEIL,
EUGENE D. LAFLEUR,
GEO. P. BROPHY,
Board of Arbitrations and Awards.

The Hon. JAMES SUTHERLAND,
Minister of Public Works.

AUDIT OFFICE, OTTAWA, June 22, 1906.

SIR,—Let me acknowledge receipt of the correspondence about the claim of M. A. Pigott for work at Meaford harbour.

Original Contract for $62,570.

The contract as signed by Mr. Pigott, for the original specification, was for $62,570, which (the informed Engineer Thompson) was calculated as follows :—

Excavation, 145,000 cubic yards at 15½ cents	$ 23,000
Crib-work at $3.50 per yard	24,000
Close-piling, 930 feet at $16	15,000
Sundry	570
Total lump sum tender	$ 62,570

Specification in Error.

Mr. Pigott now establishes the fact that the plans were wrong as to the depth of water before the dredging was begun, and that, to get 20 feet depth, he had to dredge 2 feet deeper than was indicated on the plans.

Moreover, although the plans and specifications provided for driving cedar anchor-piles, and white pine close-piles, the depth of earth was only 4 feet, with hard-pan and shale underneath, through which piles could not be driven.

Contract limitations Abandoned.

At page 54 of the evidence, Mr. Gobeil proposed to ascertain what the cost to Mr. Pigott would have been if he could have carried out the original contract, then the cost as actually performed, and to make a calculation from these two sums.

Mr. Riddell refused to proceed on the basis of the original contract, but demanded that the actual cost alone be considered.

The limitations of the contract were thereupon abandoned, and a settlement was prepared along the lines of cost of work as performed ; the prices being fixed to allow Mr. Pigott remuneration for his superintendence, but no further profit. The additional allowance is $66,034.16, with $9,905.12 interest.

Position taken by Auditor General.

No objection is taken to this settlement on its merits, but it has always been held by this office that a department has no power to waive its contracts. That should be done only by Order in Council, with full and explicit statement of the circumstances. Please have this omission repaired in the present instance.

Negligence in Preliminary Survey.

The surveyor who made the first survey, soundings and general inquiry, should have acquired a more accurate knowledge of the geology of that part of the country. He should certainly have been able to approximate to the depth of the hard-pan and rock ; the total cost of the work was such as to warrant the digging of test-pits.

Also, the error of 2 feet in depth of water is too serious to be passed over without comment and investigation.

It will be remembered that similar careless surveying at Depot Harbour gave rise to much trouble in dealing with Messrs. Davis, Haney & Miller's crib-work.

I would like to be informed that your system has since been so changed, that accurate surveys and testings are now obligatory and unavoidable .

Engineer and Inspector.

At page 246 of the evidence, Mr. J. G. Sing, the engineer in charge, testified that he had never had to do particularly with the construction of crib-work, superintendence of dredging, &c.; but had done more bridging and that kind of work. At page 268 he said that he had no harbour experience, except from observation and study. He had charge of dock at Thornbury, but Meaford was his first experience of harbour work.

Mr. John Clark, the inspector, testified, at page 321, that he had always been a farmer, and at page 323 that this was his first experience at harbour work.

Would it not be safer to employ officials of greater experience ? From our point of view, the subsequent accounting would be less difficult.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Extract of Order in Council of July 12, 1906.

Public Works:—On a report dated July 4, 1906, from the Minister of Public Works, stating that under the authority of a vote of parliament to pay contractor M. A. Pigott the balance due him in connection with the performance of certain works in the harbour of Meaford, Ont., an application was duly made to the Auditor General for the payment of the amount so due and authorized by that vote; the report of the investigation in that claim being sent to the Auditor General, together with the evidence adduced in support thereof.

The minister further states that in a communication to the Department of Public Works on this matter, the Auditor General defines his position in the following words:—

'Position taken by the Auditor General:—No objection is taken to this settlement on its merits, but it has always been held by this office that a department has no power to waive its contracts. That should be done only by Order in Council, with full and explicit statements of the circumstances. Please have this omission repaired in the present instance.'

The minister further states that the recommendation which was made and upon which the vote of parliament was obtained for the payment to M. A. Pigott was based upon the fact that in the course of the execution of the contract conditions were found to be so changed that the mode of construction was completely altered.

The minister further states that in a certain case a concrete wall was substituted for the piling proposed; in another part of the work instead of the piling specified to be constructed with timber piles, iron piles were put in. In connection with the dredging an error occurred in the plane which was given as that to which the dredging was to be referred, and, furthermore, the material which was to be dredged was of a nature quite different from that which was contemplated in the contract.

That under those changed conditions it was held that the continuation of the contract as entered into could not be properly carried on in the same manner as what was practically a new contract with new features in the construction, and the carrying on thereof had been executed, and the officers of the Department of Public Works reported as to the value of the work done, which was embodied in a report upon which the application to the Auditor General was based.

The minister recommends that authority be given for the payment of the sum of $75,939.28, mentioned in the application to the Auditor General and also authorized to be paid by the special vote of parliament which reads as follows:—

'Meaford harbour—To pay contractor M. A. Pigott, arbitrators' award of $66,162.24 in full and final settlement of all claims preferred in connection with his contract for pile work and dredging to June 15, 1900, inclusive of interest at 5 per cent from date of final estimate in his favour of July 31, 1902, up to the date of payment of award.'

The committee advise that the requisite authority be granted.

J. J. McGEE, *C.P.C.*

AUDIT OFFICE, OTTAWA, July 19, 1906.

SIR,—We have just received from Mr. McGee a copy of an Order in Council dated July 12, giving authority for waiving the contract provisions in the case of Mr. M. A. Pigott's claim for work at Meaford harbour.

The certificate for $75,939.28 will therefore be released without further delay.

Your attention is however called to the paragraph in Mr. Fraser's letter of June 22, 1906, wherein he says: 'I would like to be informed that your system has since been so changed, that accurate surveys and testings are now obligatory and unavoidable.'

Please discuss this question at an early date.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *For A.G.*

Mitchell's Bay, Ont., Dredging: No Deduction for Overcasting.

AUDIT OFFICE, OTTAWA, August 25, 1906.

SIR,—Let me acknowledge receipt of your application No. 86, for $1,055.40, in favour of the Chatham Dredging Co., being for 7,036 cubic yards at 15 cents, excavated in Mitchell's Bay, Ont.,and overcast.

No copy of the contract or agreement has been received at this office. But if the company signed the usual specification, the price per cubic yard would include three miles' towing.

In previous cases of overcasting, three cents a yard has been deducted from the schedule rate, as a deduction for towing not performed. Why was this not done in the present instance?

Please send a copy of whatever agreement was signed by the company.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

NOTE by Auditor General, Dec. 4, 1906: No answer has been received to this letter, and the payment has not yet been made.)

Owen Sound, Dredging: Extra for C. P. R. Slip.

ENGINEERS' OFFICE, TORONTO, March 20, 1906.

DEAR SIR,—I am in receipt of your letter of the 15th inst., inclosing copy of a letter to you from Mr. A. F. Bowman with reference to the dredging performed by him in the C.P.R. slip at Owen Sound.

The statements in Mr. Bowman's letter are correct in regard to the work in the C.P.R. slip. On October 27 last, I received instructions from the Chief Engineer, as follows: 'You are authorized to enter into an agreement with Bowman Bros. to perform the dredging required by the C.P.R. Co., in the harbour of Owen Sound, at a cost not to exceed $3,500, in accordance with your report dated the 26th inst.'

The foregoing instructions were duly complied with, and I was successful in making an agreement with Mr. Bowman to do the work at 17 cts. per yard, which was 3 cts. below the estimated cost.

On the advice note, dated December 13, 1905, which accompanied the account for $3,419.55, a memorandum was made which explained the account and called attention to the number and date of the Chief Engineer's letter authorizing the work.

Yours obediently,

The Asst. Supt. of Dredging. J. G. SING, *Engineer in Charge.*

AUDIT OFFICE, OTTAWA, April 30, 1906.

SIR,—Let me acknowledge receipt of your application No. 713, for $603.45, in favour of Mr. A. F. Bowman for dredging in Dec., 1905, at Owen Sound harbour.—being for 20,115 cubic yards of clay dredged from the C.P.R. slip, at 17 cents a yard, instead of 14 cents as previously paid.

The contract of Aug. 7, 1905, for 'All the works required to deepen, dredge out and clear wholly and entirely of all materials whatsoever, the harbour of Owen Sound,' contains an item of 14 cents a yard for clay; and it appears to be for this reason that payment for the work at C.P.R. slip was first made at 14 cents.

There is now a letter attached from Resident Engineer J. G. Sing, stating that he had made an agreement with Mr. Bowman to do the work for 17 cents.

It is not at present quite clear to me, why the dredging at the C.P.R. slip does not come under the 14 cent item, as part of 'All the work required to deepen and dredge the harbour of Owen Sound.' Please explain further.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, May 14, 1906.

Memorandum for the Deputy Minister.

With reference to the letter of April 30, from the Auditor General relative to the different prices paid for dredging in the harbour of Owen Sound, I have the

honour to inform you that the work in the C.P.R. slip was not included in the first contract. It was more difficult to perform owing to the lateness of the season and the restricted area between the slip walls in which the dredge had to move, and the scows and tugs handled. The price was therefore fixed at 17 cents.

EUGENE LAFLEUR, *Chief Engineer.*

AUDIT OFFICE, OTTAWA, August 10, 1906.

SIR,—In further discussion of the claim of Mr. A. F. Bowman for $603.45, for three cents extra on 20,115 cubic yards of clay dredged from the C. P. R. slip at Owen Sound:

Please let me have a copy of the plan or diagram which was furnished to Mr. Bowman along with the original specification, to indicate to him the portions of the harbour which he was expected to dredge in 1905.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *For A.G.*

PUBLIC WORKS DEPT., OTTAWA, August 18, 1906.

SIR,—With reference to file No. 93762, herewith inclosed, being a letter from the Auditor General in regard to an account by Mr. A. F. Bowman for $603.45, for dredging in the C. P. R. slip, at Owen Sound, Ont., I have the honour to state, in explanation, the following facts: On October 27, last, Mr. Resident Engineer J. G. Sing, received instructions from the chief engineer to enter into an agreement with Messrs. Bowman Bros., for the performance of the required dredging in the C. P. R. slip, and the amount authorized was $3,500. Mr. Sing was successful in making an agreement with Mr. Bowman to do this work at 17 cents per yard; he would not undertake it at a lower rate, owing to the lateness of the season, and the annoyance and disturbance caused by boats using the slip. When the work was completed, an account was submitted, amounting to $3,419.55, for the removal of 20,115 cubic yards, at the rate of 17 cents per yard, according to the agreement. This account was reduced in the office of the assistant general superintendent of dredging, to 14 cents, which was the price paid Mr. Bowman for dredging on the harbour, Mr. Godwin not being aware then of the agreement entered into with Mr. Bowman for this special work. Subsequently an account for the balance due, $603.45, under the agreement, the difference between 14 cents and 17 cents per yard, which was the amount deducted from Mr. Bowman's account, was made and sent in for payment. I inclose herewith a sketch of the dredging performed in this connection, as requested by the Auditor General.

I am, sir, your obedient servant,

The Secretary, Public Works. A. ST. LAURENT, *Asst. Chief Engr.*

P.S.—I find that no plan showing area to be dredged, original contract of 1905, accompanied instructions given. Dredging was to be performed at such places as directed by the chief engineer.

The agreement made for dredging slip was to meet special conditions as explained above.

A. ST. LAURENT.

AUDIT OFFICE, OTTAWA, August 30, 1906.

SIR,—Let me acknowledge receipt of your communication No. 158567, of August 29, inclosing a report of August 18 from Mr. Arthur St. Laurent, the assistant chief engineer, on the subject of dredging Canadian Pacific Railway slip at Owen Sound, in November and December, 1905, by Mr. A. F. Bowman.

Mr. Bowman signed the contract of August 7, 1905, for 'All the works required to deepen, dredge out and clear wholly and entirely of all materials whatsoever, the harbour of Owen Sound.' The clay-item of the schedule is 14 cents, and this rate was allowed by Superintendent Godwin on his first taxation. The chief engineer, however, had previously (October 27, 1905), instructed the resident engineer to make a special agreement for the Canadian Pacific Railway slip on account of increased difficulty, and Mr. Bowman agreed for 17 cents instead of 14 cents. It is now proposed by the department to pay the extra 3 cents on 20,115 yards, or $603.45.

From the point of view which has to be taken by this office, we are unable to select, out of the original specification, any portion of the work on account of its exceptional case or difficulty. Some parts may be facile—Mr. Bowman gets 14 cents ; others may be difficult—he gets 14 cents.

The only question for us to consider is—is the Canadian Pacific Railway slip covered by the wording 'All the works required to deepen the harbour of Owen Sound'? We hold that it is so covered.

Have you had an opinion from the Justice Department on the subject ?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(NOTE by the Auditor General Dec. 4, 1906 :. This claim of $603.45 has not yet been paid.)

Port Arthur, Dredging: Allowance for Quicksand.

AUDIT OFFICE, OTTAWA, August 11, 1906.

SIR,—Let me aacknowledge receipt of your application No. 915 for $12,130.97 in favour of A. F. Bowman, for 'Balance under reclassification of material, Port Arthur dredging, May to September, 1905.'

Abstract of Claim.

The calculation of $12,130.97, based on the work from May to August, 1905, may be summarized as follows :—

	Yards.	*Rate.*	*Amount.*
Clay.	242,337	$0 14	$ 33,927 18
Quicksand.	80,774	0 29	23,424 46
Short-paid in error.		.....	15 01
	323,111	.....	$ 57,366 65
Less—Paid before as clay. . . .	323,112	0 14	45,235 68
			$ 12,130 97

It will be noticed that 242,337 and 80,774 are respectively three-fourths and one-fourth of 323,111.

Explanation by Resident-Engineer Temple.

Attached to the application are, a letter from Engineer Temple, dated September 9, 1905, with analyses of material dredged, showing varying percentages of clay and sand, and a further report from Mr. Temple, dated January 23, 1906, which is quoted below in full :

'To E. D. Lafleur, Esq., Chief Engineer:—Sir.—The contract for dredging Port 'Arthur harbour was made on a schedule price, that for clay being 14 cents, and quick-'sand 29 cents per cubic yard.

'In view of the difficulty in determining the exact proportions of the two mate-'rials, and the consequent price the contractor would be entitled to under the contract 'for work performed, several samples of the materials have been analysed by Prof. 'Hille and found to contain proportions of quicksand varying from 14:40 per cent to '57:25 per cent.

'To have determined day by day the percentage for the purpose of making out the 'contractor's monthly accounts, would have necessitated a daily laboratory test of mate 'rial. This being impossible, to obviate same, and with the knowledge of the result 'of the several tests made, I recommended that the Contractor be allowed 25 per cent 'of all material dredged, and to be dredged, at quicksand rate, viz.: 29 cents per cubic 'yard (except where pure quicksand and hard-pan is met with, for which prices are 'specified in contract). On this basis, the contractor would receive 17¾ cents per cubic 'yard for quantity dredged.

'I beg to renew my recommendation to the Honourable Minister, and to certify 'that in view of the circumstances related, I consider a settlement with the Contractor 'on this basis a fair and reasonable one. (Sgd.) E. B. Temple, Resident Engineer.

Specification and Contract-Schedule.

The Specification of April 7, 1905, contained this paragraph: 'The material to be removed is chiefly composed of clay, boulders and clay, quicksand, and hard-pan; and different prices will have to be quoted by intending contractors for these different kinds of material in the scow.'

The items of the contract-schedule are:—

Quicksand, per cubic yard	29	cents.
Clay, per cubic yard	14	"
Clay and boulders, per cubic yard	22	"
Hard-pan, per cubic yard	50	"

Date of New Settlement.

We will need, I think, to have further information as to the date when the arrangement was first made by proper authority (and communicated to the inspectors) that the nature of the material need not be observed and recorded, as everything would be paid at one-fourth quicksand and three-fourths clay.

Inferring from the progress-estimates, the September dredging was paid under the new arrangement; while the dredging between May and August was mostly paid in the manner described in the contract-schedule, namely, clay separately, and quicksand separately, notwithstanding any difficulty experienced in approximating to the quantities of each.

Objections by Auditor General.

While it is not for this office to pass upon the merits of the revised arrangement as a business transaction, two difficulties arise (with the information now available), as follows:—

1st. The fixing of the proportion of quicksand in mixed dredging at one-fourth of the whole material was such a radical change in the specification and contract, that its application to future dredging should have been submitted to the Governor in Council.

2nd. For past dredging, where we have records of the classification of the materials as actually brought up, even if the inspectors may have had difficulty in making the classification: these records should now be adhered to, as far as the past is concerned.

Analysis of Dredging between May and August, 1905.

The returns made out by the inspectors, presumably under their original instructions, divided the whole 323,112 cubic yards (now at issue) into the following classes of material:

	Cub. Yds.	
Clay	91,376·5	
Soft clay	38,260·5	
Mud and clay	22,312·	
Mud, with streaks of clay	20,346·	
Mud, with streaks of soft clay	12,464·	
Clay, stiff, with hard streaks	5,337·	
Hard clay and small stones	4,277·	
Sticky clay	3,971·	
Mud	3,474·	
Medium hard clay	3,434·	
Hard clay and stones	1,505·	
		206,757
Clay and sand	39,985·	
Clay, with mixture of sand	28,874·	
Clay, with slight mixture of sand	23,593·	
Mud and clay, with stiff hard streaks, some quicksand	11,871·	
Mud and sand	9,416·	
Soft clay and quicksand	2,616·	
		116,355
		323,112

If objection No. 2 holds (as stated above), the total of 'sand-less' material, namely, 206,757 yards, would stay at 14 cents, instead of having one-fourth raised to 29 cents.

Probable Payment, if Allowed by Council.

If no other difficulty arises at a later stage, and if the work done after change-notification is authorized at the new rates by Council, an interim payment might perhaps be made on some such lines as these:—

Allowances for quicksand, one-fourth of 116,355 = 29,089 c.y., at 15 cents	$ 4,363 35
Short-paid previously by error	15 01
Probable payment	$ 4,378 36
This is less than the claim of	12,130 97
by a difference of	$ 7,752 61
which checks as follows: Claimed, 80,774 c.y.: paid 29,089 c.y.; deducted 51,685 c.y., at 15 cents	$ 7,752 75
Less, 323, 112—323,111=1 c.y., at 14 cents	0 14
	$ 7,752 61

Inconsistency in Mr. Temple's Arrangement.

Mr. Temple says, in his letter of January 23, 1906: 'I recommended that the contractor be allowed 25 per cent of all materials dredged, and to be dredged, at quicksand

rate, viz.: 29 cents per cubic yard (except where pure quicksand and hard-pan is met with, for which prices are specified in contract.'

If 'pure quicksand' is to remain fixed at 29 cents, because so specified in the contract, why not the same permanence at 14 cents for 'pure clay,' which price is specified in the contract with equal explicitness?

Ranging through 'clay,' 'soft clay,' and 'mud with streaks of clay,' down to 'stiff clay with hard streaks' and 'hard clay with stones,' there is under this head a total of 206,757 yards, with no suggestion of quicksand about any of the descriptions.

Channel to Neebing River.

Please send a diagram of Port Arthur harbour and surroundings, to elucidate this item. A volume of 53,551 cubic yards is charged for this service, as quicksand.

If Mr. Temple's arrangement is shown to be inconsistent, as essayed above, and if all material is to be lumped together, without exceptions, this 53,551 yards will be charged as three-fourths clay and one-fourth quicksand, in the event of the re-classification being dated from May instead of September.

I am, sir, your obedient servant,

FREDERICK HAYTER, *For A.G.*

The Deputy Minister of Public Works.

PUBLIC WORKS DEPT., OTTAWA, August 22, 1906.

SIR,—In file No. 293709 the Auditor General in a letter dated August 9, 1906, acknowledges an application for $12,130.97 in favour of Mr. A. F. Bowman for dredging at Port Arthur, May to September, 1905, and asks for additional information.

In regard to the classification of the material the chief engineer, upon the recommendation of Mr. Resident Engineer E. B. Temple, decided to allow the contractor 25 per cent of the total quantity of material dredged by him in the harbour as quicksand, provided the percentages in the different localities where quicksand had been met with, aggregate in the average 25 per cent.

While it is true, as remarked by the Auditor General, that the inspectors in their weekly returns only mention 'clay,' 'soft clay,' 'mud and clay,' down to 'stiff clay with hard streaks,' without stating percentage of quicksand, it was simply because they could not, from inspection, state the percentage. All clay in the harbour, I am informed, contains a certain proportion of quicksand, and a settlement with the contractor on the basis of 25 per cent as quicksand was arrived at as being fair and reasonable, and the best settlement that could be made under the circumstances in the interest of the department.

Inclosed is a statement of analysis made by Prof Hille for the contractor, of various samples of clay taken from different localities where dredging was done. You will notice some of the samples contained a large percentage of quicksand. I trust that this explanation will be satisfactory.

I am, sir, your obedient servant,

The Secretary, Public Works. A. ST. LAURENT, *Asst. Chief Engr.*

AUDIT OFFICE, OTTAWA, Sept. 4, 1906.

SIR,—Let me acknowledge receipt of Letter No. 158764, of August 31, from your department, inclosing a report of August 2, from Assistant Chief Engineer Arthur St. Laurent, on the subject of Mr. A. F. Bowman's claim for dredging quicksand at Port Arthur harbour in 1905.

The report in question says: 'While it is true, as remarked by the Auditor General, that the inspectors in their weekly returns only mention clay, soft clay, mud and

clay, down to stiff clay with hard streaks, without stating percentage of quicksand, it was simply because they could not, from inspection, state the percentage. All clay in the harbour, I am informed, contains a certain proportion of quicksand.'

Please let me have, as usual, the amending-returns sent in by the local inspectors, and quoted above by the Assistant Chief Engineer, in which they now report that 'clay' should have been reported as 'clay and quicksand,' 'soft clay' as 'soft clay and quicksand,' &c., and that their reason for reporting in the first form was that they were unable to ascertain the percentage of quicksand. Their letters should explain why they reported an indefinite mixture of sand in some cases, and not in those now under discussion.

Also, Mr. St. Laurent might be askd for any other information which may have reached him, to the effect that all the clay in the harbour contains a certain proportion of quicksand.

My letter of August 9 asked that an Order in Council be obtained for such a radical change in the specification and contract. What progress has been made in this direction?

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, Sept. 7, 1906.

SIR,—With reference to Mr. A. F. Bowman's claim for dredging quicksand at Port Arthur harbour in 1905, the Auditor General in a letter of the 4th instant, file 294,628, refers to my report of the 2nd ultimo in this connection and asks for further information.

The Auditor General says: 'Please let me have, as usual, the amending returns sent in by the local inspectors and quoted above by the Assistant Chief Engineer, in which they report that "clay" should have been reported as "clay and quicksand," "soft clay" as "soft clay and quicksand," &c., and that their reason for reporting in the first form was that they were unable to ascertain the percentage of quicksand,' &c.

To this I beg to respectfully remark that as far as my knowledge goes in relation to facts connected with this matter, no amended returns were obtained from the local inspectors, nor was it my intention in my report to convey the impression that such were obtained.

The statement that the inspectors could not, from inspection simply, state the percentage of quicksand, is based on a statement made by the Resident Engineer, Mr. E. B. Temple, who has been connected with this work continuously.

It was based also on my own experience in such matters, as it appeared to me that Mr. Temple's statement was certainly correct.

In the ordinary course of dredging work, for instance, in dredging sand, though there is almost always a certain proportion of clay or silt in it, inspectors would report the material as sand simply, unless the percentage of clay would become large enough to be easily noticeable to the eye without any special test or analysis. The same in dredging certain clays with sand in them. If the sand forms a thorough mixture with the clay, a percentage of 15 or 20 per cent of the sand generally might not be noticed by inspectors without special tests if it is extremely fine sand. Even when pockets or streaks of sand in the clay are very visible when deposited in the scows, it is my opinion that it would not be possible for even the most experienced inspector to state the proportions any closer than ten or twenty per cent.

Therefore, good judgment supplemented by experience can only be the basis of a conclusion and agreement in adjusting matters of this kind.

I understand that consultations were held in this regard between the Chief Engineer, the Assistant Superintendent of Dredging, and the Resident Engineer, and

after having taken everything into consideration and weighed all the facts, the conclusion was reached that it would be fair and just to allow a general percentage of 25 per cent of quicksand, as it was materially impossible to get at the exact quantity for every scow load taken out.

The opinion expressed that all the clay in the harbour contains a certain proportion of sand is made from information obtained from the Resident Engineer who states that this is Professor Hille's opinion, based on analysis of several samples of clay taken in different locations where dredging was performed. A copy of Professor Hille's results in testing this material was attached to my letter on 2nd ultimo, and must have been supplied to the Auditor General.

In conclusion, it is my opinion that the decision reached was fair and equitable.

I am, sir, your obedient servant,

The Secretary, Public Works. A. St. LAURENT, *Asst. Chief Engineer.*

Extract of Order in Council October 27, 1906.

Public Works :—That in connection with the contract entered into with Mr. A. F. Bowman for the execution of dredging in the harbour of Port Arthur, authority be given to allow in all estimates from the month of May, 1905 until completion of the contract, where quicksand will be found mixed with other material, the figure of 25 per cent of the material dredged at quicksand rates, viz.: 29 cents per cubic yard, the balance to be at the rate mentioned in the contract for the other classes of material enumerated in the schedule of said contract.

J. J. McGEE, *C.P.C.*

(Note by Auditor General : This claim of $12,130.97 is at present undergoing readjustment in the Public Works Department.)

Port Arthur Harbour: Breaking Ice in 1902-3.

AUDIT OFFICE, OTTAWA, October 30, 1906.

SIR,—Let me acknowledge receipt of application No. 313 from your department, for $1,402.50 in favour of the Great Lakes Dredging Company, for 'Services of tugs breaking ice in Port Arthur harbour, December, 1902, and April and December, 1903.'

For accounts of such remote date, there should be an explanation of the delay in rendering the bill.

It is also usual to obtain Orders in Council for all services so far removed from ordinary routine that payment does not follow closely upon performance.

Please let me have copies of the engineer's letters ordering the work to be done.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

(Note by Auditor General, December 4, 1906: No answer has been received to this letter, and the claim of $1,402.50 has not yet been paid.)

Saugeen River, Dredging: Allowance for Hardpan.

AUDIT OFFICE, OTTAWA, August 10, 1906.

SIR,—Let me acknowledge receipt of your application No. 943 for $8,191.80 in favour of A. F. Bowman, being an allowance for hardpan dredged from Saugeen river, between June 1 and July 21, 1905.

The calculation is as follows :—

Hardpan, 9,102 c.y. at $1.50	$ 13,653 00
Less—Already paid as clay and boulders, 9,102 c.y. at 60c.	5,461 20
	$ 8,191 80

Resident Engineer Lamb explains that the hardpan was first reckoned at 3,150 out of a total theoretical excavation of 32,180 yards ; that it was then raised to 3,945 out of a total actual excavation of 40,305 yards; and that, on Mr. Bowman's refusal to accept 3,945 yards, a discussion with him on January 17 fixed the hardpan at 9,102 yards, to be recognized by both parties.

Please send calculations of the amounts shown above, namely, 3,150, 32,180, 40,305 and 9,102 yards. There should be an explanation of the disagreement between the theoretical excavation of 32,180 yards and the actual excavation of 40,305 yards.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. FREDERICK HAYTER, *for A.G.*

OFFICE OF THE ENGINEER IN CHARGE, LONDON, August 21, 1906.

SIR,—In accordance with instructions contained in your letter No. 3481, dated 16th inst., I inclose, herewith statement, with accompanying plan, which I trust will give clearly the information asked for by the Auditor General, in his file No. 293767, dated 10th inst., in regard to the amount of hard-pan allowed Mr. A. F. Bowman for dredging performed in the Saugeen river, in June and July, 1905.

In reference to the explanation asked for by the Auditor General, of disagreement between the theoretical excavation of 32,180 and the actual excavation of 40,305 cubic yards, the only possible reasons that I can submit are: first, the soundings before dredging were taken about two months before work was started, and a certain amount of filling in may have occurred during this time; secondly, the sides of channel were found to have been dredged in a very irregular manner, and thus, possibly, a certain additional amount, more than shown by soundings, may have been taken out.

I beg to add that some of the reasons for increasing the amount of hard-pan from 3,150 to 9,102 cubic yards, were as follows:—

The material in area hatched green on plan attached was, according to the inspector's returns, and to the contractor's contention, practically as hard to excavate as that which had already been allowed as hard-pan, and took as long to excavate; secondly, the chemical analyses of samples taken from this latter area were identically the same to that on area first allowed as hard-pan; thirdly, all of this portion of the total area excavated, as well as considerable more was classified by the department's representative on the work, i.e., the inspector, as hard-pan, and whose certification it was impossible to entirely ignore; and fourthly, according to departmental reports, work previously performed in this district was largely classified as hard-pan.

Will you kindly note that some of the detailed figures in connection with the first estimates on this work have been mislaid or lost, and this accounts for the fact that there is a slight difference in the grand totals of estimates on statement attached; however, a careful checking has brought the totals very close to those previously given.

In conclusion, I would respectfully draw your attention to the fact that this was a very difficult matter to adjust, owing, principally to the fact that our inspector certifies most positively that the full amount, 40,305 cubic yards were excavated; secondly, the fact that in a most systematic manner he had classified a very much larger amount of the material dredged as hard-pan than we have now allowed the con-

tractor, and thus, in my opinion, the best settlement possible under the circumstances, has been made by the department.

Yours obediently,

The Assistant Chief Engineer, Public Works. H. J. LAMB, *Engr. in Charge.*

(NOTE by Auditor General, December 4, 1906: This claim has not yet been paid.)

Toronto Harbour: Award to Murray & Cleveland.

AUDIT OFFICE, OTTAWA, October 22, 1906.

SIR,—Let me acknowledge receipt of your application No. 202 for $63,685.14 in favour of Murray & Cleveland, marked as 'amount of award on contract, by A. Gobeil, Eug. D. Lafleur and Geo. P. Brophy, dated May 26, 1906,' and chargeable to 'Toronto harbour.'

The date of Murray & Cleveland's contract was May 21, 1889, and the specification was modified in 1890. The work was completed in 1893 or 1894, since which date the present claims have been pending.

The amount of $63,685.14 (for additional work under the changed specification), was calculated by Messrs. Gobeil, Lafleur and Brophy, by 'deciding what would be a fair and reasonable price for such additional work,' after setting aside the contract provisions as inapplicable.

The wording of the special vote is 'Toronto harbour: works at eastern entrance, balance due contractors, Murray & Cleveland, $63,685.14.'

We can, I think, fairly assume that 'balance due contractors' here means 'balance due under the contract, as ascertained by the usual recognized methods.'

Without explicit parliamentary authority to the contrary, the awards of the Departmental Board of Arbitration have the full weight of the judgment of its individual members under the contract, but no more.

In my opinion, when a specific vote of parliament is taken to cover an amount alleged to be due after contract obligations have been set aside, the wording of the vote should show clearly the manner in which the amount is arrived at.

As the vote now stands, it is not a declaration by parliament that the amount voted is due the contractors; but merely a provision to pay the balance due the contractors after such balance has been ascertained in the ordinary manner, which would in this case be the amount due according to contract.

Please have this item re-voted at the coming Session, with a full description of the manner of its calculation, as shown at the foot of page 8 of the award; and mention the dates when the work was performed, and the fact that $63,685.14 is not a direct result of the contract-provisions, but was arrived at by setting them aside.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Re Wharf Grande Vallée.

AUDIT OFFICE, OTTAWA, March 20, 1906.

SIR,—It was stated in the House of Commons yesterday that the wharf at Grande Vallée, P.Q., was completed in the spring of 1905.

I have to inquire if this wharf has been transferred to the Department of Marine and Fisheries, and if so, when ?

I do not find that any fees from this wharf have yet come to account.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, March 30, 1906.

SIR,—I beg to acknowledge the receipt of your letter of the 20th instant, and to inform you, in reply, that the wharf at Grande Vallée, P.Q., has not yet been transferred to the Department of Marine and Fisheries.

I have the honour to be, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

Re Slides and Booms.

AUDIT OFFICE, OTTAWA, May 5, 1906

SIR,—The receipts from slides and booms, Ottawa district, for the current year is $6,707.99 less than the previous year.

The receipts from the Newcastle district was $2,266.70 in 1902-3; $2,054.47 in 1903-4; $1,790.73 in 1904-5, and nothing has come to account so far for the current year.

Kindly explain the falling off in this revenue.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, May 21, 1906.

SIR,—I beg to acknowledge the receipt of your letter of the 5th instant, in reference to the falling off in the revenue from slides and booms during the current year, and to inclose herewith a copy of a memorandum from the collector of revenue, Mr. E. T. Smith, containing the information desired by you.

I have the honour to be, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

OTTAWA, May 16, 1906.

SIR,—I have before me a letter of the Auditor General, dated 5th instant, inquiring about the falling off of the revenue from Ottawa district slides and booms during the current year, compared with the previous year, the deficiency being $6,707.99.

This is more than accounted for by the shortage in tolls from the Petewawa.

Had all the timber come out to the Ottawa, the tolls would have been $13,221.95, whereas, owing to the quantity hung up for want of water, the actual revenue was only $4,940.31, or $7,459.32 less than in 1904-5.

Owing to proposed re-organization of the Newcastle district, nothing was done towards collection of the tolls. This matter being about settled, I am to proceed immediately to get in the dues.

The falling off in this district is attributable to the gradual decrease in the business done on these waters by the Rathbun Company, which last year, 1905, was absolutely nil as regards timber using government works.

I am, sir, your obedient servant,

The Secretary, P. W. Dept. E. T. SMITH, *Col. of Pub. Works Revenue.*

Re **Telegraph Revenue.**

AUDIT OFFICE, OTTAWA, April 3, 1906.

SIR,—Your revenue return No. 19 was received March 27, accompanying deposit receipts on account of telegraph revenue. The total amount credited to this account during the present fiscal year is $57,046.73.

On March 16 the first returns appertaining to this revenue reached this office, but no departmental statement accompanied it.

The following memo. shows that some of the offices are behind in accounting for their receipts:—

Anticosti, last month covered August.
Escuminac, last month covered November.
Kamloops, Nicola and Penticton, last month covered June.
Magdalen Islands, last month covered September.
North Shore W. B., last month covered October.
Pelee Island, last month covered September.
Quarantine, last month covered November.

Without full returns it is not possible to determine closely whether the revenue from the Yukon and from the North Shore E. B. is coming to account as promptly as it should.

Your attention will oblige.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, April 12, 1906.

SIR,—I beg to acknowledge the receipt of your letter of the 3rd instant, respecting the telegraph revenue of this department, and to state that the Superintendent of the Government Telegraph Service has been instructed to give the matter immediate attention.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, June 14, 1906.

SIR,—In your letter of April 12, in reply to mine of the 3rd, you stated that the Superintendent of the Telegraph Service had been instructed to give the matter immediate attention.

I have to inform you that the present condition of this revenue is even more unsatisfactory than it was at the date of my former letter.

No returns have since been received, and deposits have not been brought to account from many of the districts as promptly as they should.

The total revenue of 1904-5 was $139,758.44. So far, the revenue of the current year that has come to account is only $69,560.89.

The revenue from the Yukon in 1904-5, was $115,876.18. So far, only $51,782.23 has come to account.

The revenue from offices on north shore of St. Lawrence east of Bersemis was $4,086.06 in 1904-5. So far only $1,858.06 has come to account.

In connection with the Yukon revenue, the last deposit that has come from Dawson is dated April 7; from White Horse, April 14; from Atlin, April 6; from Vancouver, April 26; from Ashcroft, April 5.

No returns for the current fiscal year have been received from many districts, and from the other districts only for first few months.

Unless this revenue is put in a more satisfactory condition in the near future, I shall be obliged to report the matter to the Treasury Board.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

DEPARTMENT OF PUBLIC WORKS, OTTAWA, June 18, 1906.

DEAR SIR,—I am in receipt of your letter of the 14th June, concerning the Telegraph revenue accounts.

I have talked the matter over with the Accountant and the Superintendent of Telegraphs, and I am sure that towards the beginning of this week those accounts will proceed to you with regularity with a view to having the whole of them disposed of within a reasonable time.

As regards the Yukon revenue accounts and your reference to the fact that some $52,000 of revenue only have come to account, I would like to draw your attention, first, to the fact that this discrepancy is not altogether due to delay in the department, but to the fact that the revenue has fallen off considerably during the year. By telegraphic communications received from the Superintendent, Mr. Rochester, I find that the total revenue from July last, to, and including the month of May, is only a little over $70,000, so that the disparity, when viewed in the light of this year's revenue, does not appear so great as when compared with the revenue of 1904-05.

I will, however, keep the matter in view and see that the returns are made regularly.

Yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, October 3, 1906.

SIR,—On April 3 last I called your attention to several districts and offices from which the receipts for telegraph revenue was not coming to account as promptly as it should.

You were again written to on June 14 to the effect that the then condition of the revenue was even more unsatisfactory than it was at the date of former letter.

In your reply of June 18, you stated that you had talked the matter over with the accountant and the superintendent of telegraphs and promised that the accounts would proceed to this office with more regularity and the whole of them be disposed of within a reasonable time.

I regret to say that your promises have not been realized. Though it is now over three months since the close of the fiscal year there are 12 offices from which all the revenue for 1905-6 has not been received. Of these the following are short one month, Escuminac, Golden and Windermere, Nanaimo and Comox, Vancouver and Salt Springs, and Victoria and Cape Bealt; Vernon and Kelowna two months; Quarantine three months; Pelee Island four months; North Shore W. B. five months, and Kamloops, Nicola and Penticton six months. There are also shortages from the Yukon and from North Shore E. B., but the returns are not complete enough to determine how much.

The agents should be required to deposit or remit the receipts whenever they have $25 on hand, and forward the returns for each month shortly after its close.

I shall be glad to know what steps you are taking in reference thereto.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. JOHN GORMAN, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, October 8, 1906.

SIR,—I have duly received your letter of the 3rd October, with reference to Telegraph revenue.

I regret myself that my expectations as regards the returns of the telegraph revenue have not been realized, but I may say that having taken the matter in hand personally, I have been enabled to effect such a change in the mode of carrying on this work that the returns for the past fiscal year will completely be in your hands within, I should say, 10 or 15 days from the present date, a large proportion of them having been received and sent in since your last letter was written. I have also made such a change in the manner of handling those returns that I trust hereafter they will be made very regularly and without any further cause for complaint remaining in existence. The illness of the General Superintendent and of his chief assistant, Mr. Parr, have rendered the work a little difficult of execution, but I may say that the rearrangement which has been made in the duties of the officials of that branch will cause the work to go on in the future quite satisfactorily.

Yours very truly,

The Auditor General. A. GOBEIL, D.M.

AUDIT OFFICE, OTTAWA, October 11, 1906.

SIR,—I have received your letter of the 8th inst. and note your statement that a rearrangement has been made in the duties of the officials of the branch, which will cause the work to go on in the future quite satisfactorily.

Since my letter of the 3rd the returns for the balance of 1905-6 have been received, and a statement of the total revenue for the year.

Accompanying this statement there is a memo. showing the condition of the Yukon lines and also of the Northwest lines.

These memos. do not agree with the statement compiled in this office. For your information I inclose copies.

What is the reason for the retention of $2,598.90 of the revenue at Dawson ? Has it since been deposited ? Has a settlement been made with the Canadian Pacific Railway Telegraph Co. ?

There is a shortage of $768.51 from the Northwest lines. Possibly the $600.42 part of the deposit of $1,152.91 made September 27 and credited to Yukon lines, should have been credited to Northwest lines. If so, it would reduce the shortage by that amount, but in that case the balance due by the Canadian Pacific Railway Telegraph lines would be increased.

The revenue from the Kamloops-Nicola line for the six months, to December 31, was $2,587.90. The revenue for the balance of the year has not been deposited.

The revenue from the district of north shore of St. Lawrence, W. B. to January 31, was $1,373.70. Nothing has since come to account.

What action has been taken in reference to these shortages?

No deposits have yet come to account for the revenue of the current year. Please have all deposit receipts in the hands of your department forwarded at once.

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, December 1, 1906.

SIR,—When the accounts for 1905-6 were closed September 15 there was $10,168.38 of the revenue accrued to June 30, 1906 not deposited. During the balance of September and the month of October, deposits came to account from the greater number of the offices short. It is desirable that the revenue for each year should be brought to account before the books are closed.

Of the offices still outstanding, I would call particular attention to those on the North Shore E. B. There is still about $500 of the revenue accrued to June 30 last not yet accounted for, and nothing has come to account for the current year.

* * * *

I am, sir, your obedient servant,

The Deputy Minister of Public Works. J. FRASER, *A.G.*

Tenders should be called for Materials, as well as for Works.

AUDIT OFFICE, OTTAWA, December 18, 1905.

DEAR SIR WILFRID,—With reference to the question of inviting tenders by public advertisement as required by Chap. 37, 4-5 Edward VII., I inclose herewith a copy of a letter sent by me to the Department of Railways and Canals regarding a difference of opinion on this subject between my predecessor and that department.

According to the present interpretation of the Act the calling for tenders is confined to the construction of works. Supplies can be purchased in any quantity without public competition.

In the letter which I inclose, on page 3, I suggest that the principle should apply to both.

If this view meets with your approval I hope the Act will be amended so as to leave no doubt in the matter.

Yours faithfully,

Rt. Hon. Sir WILFRID LAURIER, G.C.MG., &c. (Sgd.) J. FRASER, *A.G.*
Ottawa.

(NOTE.—The inclosed letter referred to above, will be found at pages W—402 and W—403 of the Auditor General's Report for 1904-5.—J.F.)

Labour- Schedules to Contracts should precede Call for Tenders.

AUDIT OFFICE, OTTAWA, July 20, 1906.

SIR,—Let me call your attention to section 12 of the Railways and Canals Act, shown at page A—8 of the Auditor General's Report for 1903-4.

The section ends as follows :—'No sum of money shall be paid to the contractor on any contract, nor shall any work be commenced, until the contract has been signed by all the parties therein named, nor until the requisite security has been given.'

With this is a list of 29 estimates on Intercolonial or Prince Edward Island railway works, for which no copy of the contract and specification has yet been sent to this office.

Inquiry at the department, as to the causes of delay, obtains the explanation that some are waiting for Orders in Council, and some for the preparation of labour schedules.

Is it not feasible so to rearrange the sequence of routine, as to have all other requirements fulfilled by the time the Progress Estimates come in for payment ?

It would appear, at first sight, preferable that the labour schedules should be constructed before the contractors are invited to tender.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. FREDERICK HAYTER, *for A.G.*

Soulanges Canal : Manning & Macdonald : Filling behind Walls.

(Continued from page W—382 of 1904-5.)

AUDIT OFFICE, OTTAWA, August 15, 1906.

SIR,—Your department forwarded sometime ago an application of 1905-6 (No. 499) for $14,271 in favour of Manning & Macdonald, marked 'Balance due for work done, &c., as per 2nd final estimate, up to January 11, 1904, section 13. It is proposed to pay this sum from 'Soulanges Canal, Capital, Construction.'

In the Supply Bill of last session, in the part available for 1905-6, there is an item, 'Soulanges Canal, Construction, $14,271,' which appears to have been intended to cover this service.

On inspection of the previous correspondence, you will find that the only work unpaid is 'Filling behind walls, 28,542 cubic yards at 50 cents, $14,271,' as shown at page W—379 to W—382 of the Auditor General's Report for 1904-5.

Please let me know whether any additional information has been procured, to supplement the correspondence printed on the pages just mentioned.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, October 22, 1906.

SIR,—With reference to the claim of Manning & Macdonald for section 13 of the Soulanges Canal, it would appear this is a matter that has been lying in abeyance for some considerable time. It would also appear that a certified copy of Mr. Grant's report was forwarded to you on August 25 last, in which he discusses Mr. Keefer's report, copy of which I inclose herewith. I have nothing to add to what Mr. Grant therein stated. His reasoning commends itself to my judgment, as he was in the best position to form an intelligent opinion as to the merits, or otherwise, of the matters under discussion.

It seems that a copy of Mr. Grant's letter of August 23, 1905, which accompanied his memorandum, has not been forwarded to you ; and I now inclose copy of the same for your information.

The present Supply Bill contains an item to cover the amount of this claim, and I would request that you be good enough to authorize payment of the same.

I am, sir, your obedient servant,

The Auditor General. M. J. BUTLER, *D.M. and C.E.*

RAILWAYS AND CANALS DEPT., OTTAWA, ONT., August 23, 1905.

MY DEAR SIR,—*Re* claim of Manning & Macdonald, section 13, Soulanges Canal, and letter of Auditor General of the 18th instant, inclosing a report from Mr. Charles H. Keefer, C.E., I have most carefully read Mr. Keefer's report, and in reply I beg to state that I do not agree with Mr. Keefer in his conclusions, nor in the reasoning by which he reaches them.

I beg to say that the material was reserved by the contractor from the main excavation at my request, and that subsequently it was placed in the work under my direction, that the end aimed at by the specification was secured, and therefore, it was selected material suitable for the purpose, and that in fact it was fairly good puddle, which material was better than that contemplated under the strict letter of the specification.

Yours faithfully,

ALEX. J. GRANT,

The Deputy Minister and Chief Engineer.

OTTAWA, ONT., June 23, 1905.

Soulanges Canal—Section 13.—Memorandum of Contractors' claims taken exception to by Auditor General :

* * * * * * * * * *

Item 17. Selected material behind walls.

From 2 to 4 feet of dry stone was placed behind the retaining walls, the balance of the selected material on completion of the lock-walls was taken in cars from the bottom of the canal, being a mixture of boulder clay and rock excavation in a wet condition, which caused it when dropped from the cars to consolidate and form a compact mass from top to bottom as called for by the specification, paragraph 74.

* * * * * * * * * *

As previously stated I consider the claims fairly established and the price allowed is fair and just.

(Sgd.) ALEX. J. GRANT.

RAILWAYS AND CANALS DEPT., OTTAWA, October 27, 1906.

SIR,—With further reference to the matter of Manning & Macdonald's claim, it would appear that on January 15, 1905, the following memorandum was made as to claim 17, the only one which is now under consideration.

Stone in Rear of Walls, $14,271.

'The quantity of selected material covered by the $14,271 is merely the balance of the actual quantity of material placed behind the walls, within an arbitrary slope of 1 to 1 (or the excavation slope of the foundation pits), and compacted by the drop from the cars and water, and not by ramming with a ramrod, but otherwise compacted.'

This memorandum bears the signature of Alex. J. Grant, the Chief Assistant Engineer, and of Collingwood Schreiber, the Chief Engineer of the department.

On comparing Mr. Grant's letter—cited by the late Auditor General, your predecessor—with his recent letter approving the present claim, two separate and distinct things are confused. Mr. Grant in his former letter dealt with a great mass of material, aggregating 63,077 cubic yards, and the amount claimed was $22,037.50; and, it was this large quantity that he alleged should not be returned at the 50-cent rate ; but the proper quantity is found as stated by Mr. Schreiber's memo. I do not know whether this memorandum ever reached your office, but it seems to me to have a material bearing upon the points at issue.

I can only say that the whole matter was one that was dealt with entirely by my predecessor, and disposed of by him; and it seems to me now that all reasonable explanations have been supplied. I trust you will be able to see your way clear to allow payment to be made.

Yours faithfully,

M. J. BUTLER, *D.M. & C.E.*

AUDIT OFFICE, OTTAWA, November 8, 1906.

SIR,—Let me acknowledge receipt of your letter of October 27, on the subject of Manning & Macdonald's claim of $14,271 for 'Filling in rear of walls,' on section 13 of the Soulanges Canal.

If the 28,542 yards approved by Mr. Schreiber are outside of the 63,077 yards condemand by Mr. Grant (at the foot of page W—341 of 1903-4), then the Audit Office has of course, as you say, confused two separate and distinct things.

But if the 28,542 yards approved by Mr. Schreiber are (as I have always understood), part of the 63,077 yards condemned so sweepingly by Mr. Grant, then we must

work on the principle laid down in your letter of October 22, that Mr. Grant "was in "the best position to form an intelligent opinion as to the merits or otherwise of the matters under discussion."

It would be more satisfactory if all previous decisions were now cancelled, and the claim referred to the Resident Engineer for a full report *ab initio*.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, ONT., November 9, 1906.

SIR,—Let me acknowledge the receipt of yours of the 8th instant with reference to the claim of Manning & Macdonald. In accordance with the suggestion made by you I have submitted the matter again to Mr. Grant.

Yours faithfully,

The Auditor General. M. J. BUTLER, *D.M. & C.E.*

Railway Subsidies : Chief Engineer's Responsibilities.

AUDIT OFFICE, OTTAWA, February 6, 1906.

SIR,—Let me acknowledge receipt of your Application No. 287 for $49,370.07 in favour of the Restigouche and Western Railway Company, being balance of their subsidy of $6,400 a mile on twenty miles out of Campbellton.

The Chief Engineer's report in favour of $6,400 a mile is based on a valuation by Engineer Johnson, dated November, 1905, showing a total estimated cost of $449,380.42, or an average of $22,446.52 per mile.

Previous Valuations by Inspecting Engineers.

Earlier estimates of the cost of the same section are on our files, as follows :—

First 10 miles, Mr. Johnson, November, 1899.	$ 179,894 00
Second 10 miles, Mr. Simmons, January, 1904.	201,448 00
Second 10 miles, Mr. Schreiber ($201,448 reduced). . . .	192,498 00
Twenty miles, Messrs. Johnson & Simmons, total. . . .	381,342 00
Twenty miles, Messrs. Johnson & Schreiber, total	372,392 00
Average, Messrs. Johnson & Simmons.	19,067 10
Average, Messrs. Johnson & Schreiber.	18,619 60

Messrs. Johnson & Simmons gave quantities and rates, in as full detail as those by which the $449,380.42 is supported. Mr. Schreiber's reduction of $8,950 is not itemized.

The difference between $381,342 and $449,380.42 is $68,038.42. Attached is a comparison of several items from the Engineers' reports, showing the services on which $65,890.38 of this difference is calculated.

Auditor General's Difficulty.

At the time when the valuations of $179,894, $201,448 and $192,498 were presented, they purported to be as valid and complete as does now the valuation of $449,380.42. Please explain in what respect they have since proved to be ameliorable ?

As a test-example of the department's manner of handling similar railway subsidy accounts, I would like a full description of the methods adopted by Messrs. Johnson &

Simmons in each case, when making their valuations; with special reference to the nature and amount of the information available to, and made use of by them.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, February 13, 1906.

SIR,—I have the honour to acknowledge the receipt of your letter of the 6th inst., relative to the application made to you for the payment to the Restigouche and Western Railway Company of a certain balance of their subsidy for the 20 miles of railway extending from Campbellton. You draw attention to the differences between the present estimate of cost of the completed road and previous estimates of that cost. You ask for an explanation, and express a wish to be furnished with the 'full description of the methods adopted' in making valuations.

I think it well at the outset, and in this early stage of my incumbency of the position of chief engineer of the department, to define simply and clearly my views of the duties entrusted to me in dealing with matters of this nature, and to state, once for all, the attitude I propose to take in regard of these railway subsidies.

First.—As I understand my duty, it is that laid down by the Railway Subsidy Act —in this instance the Act of 1901 : I find there that it is my duty to ascertain the actual, necessary and reasonable cost of the line of railway, which 'shall include the amount expended upon any bridge, up to and not exceeding $25,000, forming part of the line of railway subsidized not otherwise receiving any bonus, but shall not include the cost of terminals and right of way of the railway in any city or incorporated town.' I am called upon to certify that I have made, or caused to be made, an inspection of the line of the said railway, and careful inquiry into the cost thereof, and if, in my opinion, 'the amount upon which the subsidy is claimed is reasonable, and does not exceed the true, actual and proper cost of the construction of such railway.' I find, further, that

upon my report, giving such certificate, and upon the recommendation of the minister of this department, 'such actual, necessary and reasonable cost shall be *determined* by the Governor in Council.'

In the present case, I have caused to be made an inspection, and have made 'careful inquiry' into the cost, and I have given my certificate that a total of $449,380.42, equalling $22,446.52 per mile, is reasonable, and does not exceed the true, actual and proper cost of the construction of the said railway. To this I add that the total subsidy for the 20 miles amounts to $128,000, from which sum all previous payments are to be deducted.

With this action on my part, fulfilling all parliamentary subsidy requirements, my duty ends, and responsibility thrown upon me having been discharged, I am called upon for nothing more, nor do I propose, in any way, to supplement my decision, as expressed in such certificate.

I would incidentally observe that, inasmuch as by the wording of the Act above quoted, the cost is to be 'determined by the Governor in Council,' and as such cost and the resultant fixing of the amount of subsidy payable has, in the present case, been so 'determined' by an Order in Council of the 22nd of Jaunary, 1906, I am unable to see that anything more is required than to adopt the ruling so given, and to make payment accordingly. This view is, of course, a matter for your own consideration, and upon you must rest all responsibility for delay in payment.

Although, as you will gather from the explicit statement of my views on the subject, I do not regard any further observations from myself requisite, I may state, as in some measure meeting your criticism, that it is recognized good practice in engineering that an inspecting engineer should, in estimating during the progress of a work, so deal with the details of his estimate as to keep himself on the safe side; in other words, his progress estimate should invariably be less than the actual value. Until the work is completed, it is not customary to embrace all details, and only when the work is finished are all the items making up the total cost comprehensively included. From this it follows, as a necessary corollary, that when the final estimate is made the total amount will exceed the total of the progress estimates. The final estimate must be regarded as embodying, correcting and amplifying all previous progress estimates. It is, I am sure, unnecessary to say to you that the foregoing definition of my views, and statement of my duty, contains no particle of suggestion of discourtesy to you. No one recognizes more thoroughly than I the importance of the functions you fulfil, and the difficulties you must experience in discharging them. With your own conception of your duties in regard to this particular class of expenditure, I have, of course, nothing to do, nor for the responsibilities attaching to its exercise, either in action or delay of action. On the other hand, I have my own duties, as laid down for me ,to discharge, and these, as I conceive them, are framed, and to be carried out for the purpose of arriving at a finality, which, after all, is the essential contemplated by parliament, and the arriving at which does not seem to be expedited by interminable discussion and diverse views of various unprofessional persons, but is rather best reached through the source expressly laid down by the Subsidy Act, for that purpose.

I am, sir, your obedient servant,

M. J. BUTLER, *D.M. & C.E.*

P.S.—I may state that the works of improvement executed on the first ten-mile section, between the date of the first inspection and the final inspection in December last, comprised the straightening of the line at a point about 2 miles from Campbellton, which involved the excavation of about 100,000 cubic yards of earth, which, at the contractor's price of 31 cents per cubic yard amounts to $31,000, and certain other work of ballasting, &c., making a total additional expenditure of $41,000.

On reference of the question to the Department of Justice as to the propriety of including these improvements in my present certificate, that department advised to the effect that I am justified in including in my new certificate the cost of the improvements referred to as being, in my opinion, reasonably necessary under the contract.—M. J. BUTLER.

Railway Subsidies : Kent Northern Railway.

AUDIT OFFICE, OTTAWA, November 9, 1905.

SIR,—Let me acknowledge receipt of your application No. 87 for a transfer entry, debiting 'Railway Subsidies 51 Vic., Chap. 3' ; and crediting 'Rails Loan Account' with $58,334.27, being for 2,549 tons of iron rails loaned to the Kent Northern Railway, to be granted as subsidy on line being relaid with steel rails, as by Order in Council of September 21, 1899.

The Kent Northern Railway item in the Subsidy Bill of 1888 (51 Vic., Chap. 3), reads as follows :—'To the Kent Northern Railway Company, of New Brunswick, a grant as subsidy (the road to be first laid with new steel rails weighing not less than 56 lbs. per lineal yard, and after an Order in Council has been passed authorising their transfer to the company) of 2,549 tons of used iron rails and fastenings loaned to the company—which rails and fastenings stand in the Public Accounts as an asset for $58,334.27.'

Section 2 of the same Act of 1888 contains the usual provision that the work must be completed within four years ; and I do not find any authority for exceptional treatment in the present instance. Please inform me of your reasons for holding that this subsidy account is still open.

The Order in Council of September 21, 1899, proposed to accept 'used steel rails' on the last three miles. I do not think that this would satisfy the wording of the 1888 Act, 'New Steel Rails.'

Were the other 24 miles laid with 'New Steel Rails' or with 'Used Steel Rails' ?

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

Railway Subsidies : Midland Railway of Nova Scotia.

(Continued from Page W—307 of 1902-3.)

RAILWAYS AND CANALS DEPT., OTTAWA, October 27, 1906.

SIR,—Referring to the departmental letter addressed on November 2, 1904, to Mr. J. L. McDougall, the then Auditor General, relative to the balance of subsidy due to the Midland Railway Company of Nova Scotia, I have the honour, by direction, to say that the department would very much appreciate it if you would give the matter your early attention, with a view to the issue of a cheque for the amount, $4,967.70, of the application that has been made to your department in that regard.

I have the honour to be, sir, your obedient servant,

The Auditor General. H. F. ALWARD, *Actg. Sec.*

AUDIT OFFICE, OTTAWA, October 29, 1906.

SIR,—Let me acknowledge receipt of a letter from your department (Reference 150), concerning $4,967.70 subsidy balance claimed by the Midland Railway of Nova Scotia.

The previous correspondence will be found in the Auditor General's Report of 1902-3. Other questions having been answered satisfactorily, the difference was narrowed down to the one item of $4,967.70 (wages with 10 per cent added). This was held for the reason shown at the foot of page W—307 of 1902-3, namely 'If Mr. Johnson has included all the materials at a valuation, how could there be a separate item of wages ?'

The difference between the two estimates (of Mr. Johnson and of Mr. Shannon) can probably be removed in another way. I understand that Mr. Johnson, since the date of his report, has found that insufficient details had been given to him by the company, and that he is now in possession of information which will enable him to revise and increase his estimate.

Application No. 412½ of 1902-3 is returned herewith, for alteration of date to 1906-7.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals, J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, October 30, 1906.

SIR,—I have your letter of the 29th instant *re* the balance of subsidy claimed for the Midland Railway of Nova Scotia. The difficulty, as I see it, narrows down to the question as to whether the accountant's statement based upon the certified vouchers produced by the railway company, are to be accepted as the actual cost of the road ; or, an approximate estimate made by the inspecting engineer.

The object in sending out the engineer is : 1st. To see that the railway is completed in accordance with the specifications and contract.

2nd. To secure from him an estimate as a guide and a check upon the cost as shown by the books. Should it appear from the estimate that the actual cost as shown by the vouchers, is an unreasonable one, then in such case it would be the duty of the Chief Engineer to ascertain how it came about that such cost was made; and, such examination would disclose, whether or not, the true, reasonable and proper cost had been exceeded, either by mismanagement or some other way. But, so long as the engineer's estimate indicates that the actual cost, as shown by the vouchers, is not unreasonable : then, I take it, it is the duty of the Chief Engineer to accept the statement of the accountant as to such true, reasonable and proper cost.

The late Auditor General seems to have reached a somewhat different conclusion, holding it his duty to always accept the lower amount, disregarding the fact that in the one case it is an estimate, and in the other a statement of fact based upon vouchers duly produced.

It does not seem to me at all material what Mr. Johnson's estimate is when it varies a few thousand dollars one way or the other, as is the case in this instance,—the true cost being shown by the statement furnished by the accountant.

Believe me to be, yours faithfully,

The Auditor General. M. J. BUTLER, *D.M. & C.E.*

AUDIT OFFICE, OTTAWA, November 6, 1906.

SIR,—Let me acknowledge receipt of your letter of October 30 concerning the balance of subsidy claimed by the Midland Railway of Nova Scotia.

In view of your very explicit acceptance of responsibility for the small difference in question, the application for $4,967.70 is now released.

As for the general question of discrepancies between the government's engineer and the company, or more properly the company's engineer :

A large factor in producing such discrepancies will usually be, that the outside engineer (engaged in active construction) will be more familiar with the modifications of current prices.

Apart from those materials whose values enhance by reason of scarceness, such as lumber and perhaps iron, the general tendency of improved methods will be, to lower the prices both of production and elaboration.

So that the government engineer's estimate would generally be in excess of the constructing engineer ; and when it is lower, as in the present instance, the difference is more worthy of attention.

I have the honour to be, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

Transcontinental Railway: Contracts for Construction.

AUDIT OFFICE, OTTAWA, August 24, 1906.

SIR,—I beg to request that you furnish me with copies of all contracts entered into by your commission for construction work now in progress in Districts B and F.

Progress estimates are now to hand in my office; and before an audit can be made, copies of these contracts are needed.

The resident engineer's certificate should be on the progress estimate as well as the chief engineer's as the resident engineer is the one who has a personal knowledge of the work.

An early answer is respectfully asked.

I am, sir, your obedient servant,

The Chairman, N.T. Ry. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, August 31, 1906.

SIR,—Your letter of the 24th instant, addressed to the chairman, has been handed to me with instructions to reply thereto.

In compliance with the request contained in your letter, I have pleasure in handing you herewith a copy of each of our contracts for construction, namely, with Messrs. Hogan & Macdonell and J. D. McArthur. Inclosed with the Hogan & Macdonell contract is copy of assignments from Hogan & Macdonell, to Macdonell & O'Brien, and to M. P. and J. T. Davis. I am having copies of our other contracts made and will send them to you in due course. In future a copy of each contract will be furnished you as soon as executed.

It will hardly be possible to comply with your suggestion that the resident engineer's certificate be placed on the progress estimate, as well as the chief engineer's. The progress estimate is prepared in the office of the chief engineer and may cover work done over several divisions under the superintendence of several divisional and resident engineers, there being as many as four or five resident engineers doing work on a divi-

sion. The progress estimate is prepared after careful checking of the divisional engineer's returns. Resident engineers report to the divisional engineers.

Trusting you will consider this explanation satisfactory.

I have the honour to be, sir, your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

AUDIT OFFICE, OTTAWA, November 10, 1906.

SIR,—I have the honour to acknowledge the receipt of your letters of 31st ultimo and 4th instant inclosing copies of contracts now in force in districts B and F ; also copies of contracts with Dominion Iron and Steel Co. and Algoma Steel Co.

With regard to the certificate of the resident engineer, I consider it *the* important signature as he is the one who has a personal knowledge of the work, and if it is impossible to have it on the progress estimate, because of its preparation in the chief engineer's office at headquarters, I would like to be supplied with copies of the divisional engineers' returns which must necessarily contain a report or return from each resident engineer.

I am, sir, your obedient servant,

The Chairman, N.T. Ry. J. FRASER, *A.G*

Transcontinental Railway: Transport of Supplies.

AUDIT OFFICE, OTTAWA, May 8, 1906.

SIR,—A number of accounts have reached this office for transporting of supplies in the different districts, and have been certified to by your officers as 'according to contract.'

It would facilitate the work here if you would be kind enough to furnish me with a sample of a contract in force at present stating how tenders were called, if any, and under what conditions the contract was given and if security is taken for the fulfilment of the contract.

I am, sir, your obedient servant,

The Chairman, N.T. Ry. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, May 11, 1906.

SIR,—I have the honour by direction to acknowledge the receipt of your letter of the 8th inst., addressed to the Chairman of the Board in regard to accounts for the transport of supplies certified by our officers as 'According to contract.'

In reply I have the honour to say that our practice is to invite tenders from residents of the district in which the supplies are being forwarded for the transport of our supplies, and in no instance have we awarded a contract at a higher price than that of the lowest tender.

I send you herewith form of contract between A. Bertrand, of the town of Maniwaki, and the Commissioners, dated December 6, 1905, for the transport of supplies, which kindly return to me after examination.

Yours truly,

The Auditor General. P. E. RYAN, *Secretary.*

AUDIT OFFICE, OTTAWA, May 18, 1906.

SIR,—I am returning, as requested in your letter of 11th instant, form of contract between A. Bertrand of Maniwaki and the Commissioners.

I presume, since you are obtaining securities with some tenders, that you are doing so in all cases, for an Order in Council, dated June 16, 1888, makes it obligatory that the proceeds of all cheques and all deposits on account of contractors' securities be deposited with the Receiver General.

In view of this I would request that in future a copy of each contract entered into by the commission be sent to this office.

I am, sir, your obedient servant,

The Secretary, N.T. Ry. Com. J. FRASER, *A.G.*

DEPT. OF JUSTICE, OTTAWA, May 25, 1906.

MY DEAR MR. FRASER,—I am asked by the Transcontinental Commission for an opinion as to whether the Order in Council of June 16, 1888, applies to contracts with the commission. This depends, no doubt, upon whether or not the provisions requiring contractors to put up securities applies to the commission. Can you refer me to these provisions ? I see you have been in correspondence with the commission on this subject.

Yours very truly,

The Auditor General. E. L. NEWCOMBE, *D.M.J.*

AUDIT OFFICE, OTTAWA, May 29, 1906.

DEAR MR. NEWCOMBE,—In reply to your letter of 25th instant in *re* Contractors' Securities for Transcontinental Commission, I beg to say that when I wrote to the Commission about the matter I had in view only the general practice of the government ; but I think, perhaps, 49 Vic., chap. 37, section 12, and 3 Edward VII., chap. 71, sections 16, 17 would apply in this case.

Yours truly,

The Deputy Minister of Justice. J. FRASER, *A.G.*

Transcontinental Railway: Land for Gravel Pits.

TRANSCONTINENTAL RAILWAY, OTTAWA, October 19, 1906.

SIR,—As requested, I beg to send herewith a summary of the lands purchased by the Commissioners of the Transcontinental Railway, deeds registered and where, the same being on file in my office. Any other particulars you require in relation thereto will be cheerfully furnished.

I am, sir, your obedient servant,

The Auditor General. H. ATKINSON, *Law Clerk.*

Name of Vendor	Description of Proterty.	Purchase Price.
W. J. Moran...	S. W. ¼ and S. W. ½ of N. W. ¼ of Section 5, Township 11, Range 8, East of 1st Meridian.....	$9,600 00.
" " ..	N. E. ¼ Section 30–10th Township and 8th Range East of Principal Meridian.....	$25,600 00.
" " ..	N. W. ¼ Section 32-10th Township and 8th Range East of Principal Meridian.....	Included in above amount.
" " ..	S. E. ¼ and S ½ of N. E. ¼ of Section 6 and the N ½ of N. W. ¼ of Section 5, all in 11th Township and 8th Range East of Principal Meridian	Included in above amount.
P. J. F. Evans..	East ½ Section 31, Township 10, Range 8, East of Principal Meridian.....	$8,300 00.

AUDIT OFFICE, OTTAWA, October 23, 1906.

SIR,—I am in receipt of a letter from Mr. Atkinson, your law clerk, inclosing a summary of lands purchased in Manitoba by the Commissioners, for gravel pits: one purchase in favour of Wm. J. Moran, Winnipeg, at $40 per acre, and the other in favour of P. J. F. Evans, of Winnipeg, at $25 per acre.

The lands of the above-mentioned parties are in adjoining townships and same range; and as there is a wide difference in the prices paid, I would like to be informed in what manner and by whom the lands were valued, and to be supplied with copies of any correspondence you may have in the matter.

I am, sir, your obedient servant,

The Secretary, T. Ry. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, October 26, 1906.

SIR,—I have the honour to acknowledge the receipt of your favour of the 23rd instant, *re* purchase of Evans and Moran gravel properties in the province of Manitoba.

These lands were purchased for the Commissioners by Mr. Thomas L. Morton, the commissioners's agent in Winnipeg, on the instructions of the board (the Commissioners having first obtained reports on the properties), the payments being made subject, in each case, to the approval of the Commissioners' Winnipeg solicitor, after a careful scrutiny of the titles.

The difference in the price per acre of these properties is explained in part by the fact that the Evans property was reported to contain gravel in somewhat less quantities, and of not quite as good quality, as the Moran property. It is also due, no doubt, to a better understanding on the part of the owners of the Moran property of the demand for gravel properties in that vicinity, as the Canadian Northern and the Canadian Pacific Railways are said to have been securing options an all desirable properties of this kind. After the Commissioners secured the option to purchase the Evans property at $25 per acre, Mr. Morton reported to the Commissioners that the Moran syndicate were endeavouring to secure it. Had they been successful in this, it is probable that the price would have been advanced to at least $40 per acre. The Canadian Pacific Railway is reported to have paid as high as $70 per acre for gravel property in that vicinity.

The correspondence relating to the purchase of these properties is quite voluminous, and I think perhaps the better way will be to send you the file, and have you indi-

cate to us the letters which you desire copies of. If you will have the kindness to do this I will have the copies made and sent to you as quickly as possible.

I have the honour to be, sir,

Your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

Transcontinental Railway: Barber & Ellis Co.

AUDIT OFFICE, OTTAWA, October 20, 1906.

SIR,—On December 5, 1905, you paid an account of the Barber & Ellis Co. for envelopes amounting to $391.20, by cheque No. 1746.

I have to request that you will send me the tenders received for these envelopes and a copy of the requisition issued for the same; and also any correspondence you may have in connection with this matter.

I have seen by the newspapers that evidence was given in connection with this account before the police magistrate in Toronto by Mr. J. F. Ellis, in which he stated that the cheque he received was in excess of the account to the extent of some $80 or $90, and that he had made a refund of this excess.

I cannot find that the refund has gone to the credit of the Receiver General and have to request that you will let me know what has become of the amount.

I am, sir, your obedient servant,

The Secretary, T.R.C. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, November 5, 1906.

Re Barber & Ellis account, $391.20.

SIR,—I have the honour by direction to acknowledge the receipt of your letter of the 20th ult., in regard to this account, and to hand you herewith copy of letter from our general purchasing agent, Mr. A. L. Ogilvie, giving a complete explanation of this matter, also copies of correspondence, copy of official order No. 1203, and copy of Barber & Ellis account of November 24, 1905, amount $391.20. An examination of the account of Barber & Ellis Company, and the Commission's cheque No. 1746, will indicate that the statement attributed to Mr. Ellis, namely, that the cheque he received was in excess of the account to the extent of some $80 or $90, is untrue, the cheque having been for exactly the same amount as the account.

It will appear, however, from Mr. Ogilvie's statement, that after having received his order and having rendered an account for the envelopes at the prices named in Mr. Ogilvie's order, Mr. Ellis advised under date of December 23, 1905, that they could furnish the envelopes for $87.05 less than the price originally agreed upon, and that, on receipt of Messrs. Barber & Ellis' cheque for $87.05, Mr. Ogilvie returned the cheque with the request that they furnish a sufficient number of No. 8 envelopes to cover the amount of the refund.

I have the honour, &c.,

The Auditor General. P. E. RYAN, *Secretary.*

OFFICE OF THE GENERAL PURCHASING AGENT, OTTAWA, November 3, 1906.

SIR,—In reply to your letter of October 30, 1906, *re* envelopes supplied by the Barber & Ellis Co. of Toronto, I beg to make the following statement *re* same:—

Requisition No. 557, dated September 26, 1905, and authorized by the Board on September 28, 1905, called for a quantity of envelopes. Shortly after the authorization of this requisition C. Davidson, representing the Rolland Paper Co., called at my office and gave me a quotation on envelopes Nos. 8, 9, 10, 11 and 12, 20-lb. Empire bond.

He took from among his samples envelopes made from the Empire bond linen, corresponding to these weights and marked on the corner the prices the firm would deliver the same, printed, to the Commission.

The prices we were paying the Printing Bureau for the No. 8 envelopes were practically the same as the prices paid to the Barber & Ellis Co., being $1.70 for 18-lb. Empire bond envelopes, and $1.78 for the 20-lb. envelopes. Also find inclosed price list from the Barber & Ellis Co., asking $1.75 per M. for unprinted envelopes of the same quality as supplied the Commission.

The Rolland Paper Co.'s prices were as follows:—

No. 8	envelopes,	$1.75	per M.,	Empire linen bond.
No. 9	"	2.75	"	"
No. 10	"	3.00	"	"
No. 11	"	3.50	"	"
No. 12	"	3.75	"	"

The representative of the Munro Commission Co. called on me at my office in Ottawa and asked if I could give him an order. I asked him if he could supply 125,000 envelopes at the prices quoted above, and if so that I would give him the order. On October 20 he replied that he could supply the envelopes at these prices, and asked me to forward the order direct to the Barber & Ellis Co., as they were to print the envelopes for him.

In explanation of the awarding of this order to the Munro Commission Co., I beg to make this statement to the board: In taking into consideration the prices paid to the Printing Bureau, I had every confidence that the prices submitted by the Rolland Paper Co. were as low, if not lower, than I could expect from any other manufacturer of envelopes, as they are the largest, and I believe, the best manufacturers of fine paper in Canada, and had assured me that the prices quoted were equal to the prices given to other firms.

On a previous endeavour to make a purchase direct from the Rolland Paper Co. they referred us to their agent, the Mortimer Co., of Ottawa. (See letter from the Rolland Paper Co., dated January 10, 1905.)

On October 25 the order was sent to the Barber & Ellis Co. for 125,000 envelopes. (See order No. 1203, my letter of November 3, 1905, and their reply of November 4, 1905, accepting the order and stating that they believed they could deliver the goods within the specified time.)

An invoice dated November 24 was sent into this office on November 25, and this invoice was made out on the voucher form of the Barber & Ellis Co. This invoice was for between nine and ten thousand more envelopes than the order called for, and called for the payment of $391.20. This invoice was passed for payment on November 29, 1905, cheque No. 1746, voucher No. 5108.

On December 23, the arber B& Ellis Co. wrote the Commission, inclosing a cheque for $87.05, which they returned with the statement that they found they could do the work cheaper than their invoice called for. On January 3, I wrote the Barber & Ellis Co., returning their cheque, and asking that they print us a sufficient number of No. 8 envelopes to cover the amount of the cheque. On January 6 they wrote saying that they did not have the Empire bond paper called for, and asked if we would permit them to substitute the Hercules bond. On January 8 I acknowledged their letter, permitting the substitution of the Hercules bond for the Empire bond. On March 7 we received the envelopes from the Barber & Ellis Co. This invoice called for the payment of 73c. The filing clerk filed this invoice with the correspondence, thinking it did not require the payment of the 73 cents, but as soon as the error was discovered the cheque was forwarded from the Commission for payment. Cheque No. 1426, October 30, 1906, voucher No. 1052.

Yours truly,

A. L. OGILVIE,
General Purchasing Agent.

The Chairman, T. Ry.

AUDIT OFFICE, OTTAWA, November 9, 1906.

SIR,—I have to acknowledge receipt of your letter of 5th inst. in reply to my letter of 20th ulto., *re* Barber & Ellis account for $391.20.

There is one part of my letter which appears to have been overlooked, viz., my request to have the tenders in connection with this matter sent me. Will you be kind enough to rectify this omission ?

In Mr. Ogilvie's letter of January 3, 1906, to Messrs. Barber & Ellis, the reason given for returning the cheque for $87.05 and requesting them to send envelopes amounting in value to the amount of the cheque was, that your appropriation would be out that amount if the cheque was deposited to the credit of the Receiver General.

Mr. Ogilvie was under a misapprehension. Had the cheque been deposited to the credit of the Receiver General it would be treated as a refund on account of the cheque issued for $391.20, and would simply have reduced the amount of the account and the prices charged to correspond with the figures stated in Messrs. Barber & Ellis' letter returning the cheque.

The Consolidated Revenue and Audit Act requires that all public moneys must be deposited to the credit of the Receiver General ; and no moneys received from refunds or any other service should be used to meet further expenditure without having first been so deposited.

I am, &c.,

The Secretary, N.T. Ry. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, November 12, 1906.

SIR,—I have the honour, by direction of the Board, to acknowledge the receipt of your letter of the 9th instant, having further reference to Barber & Ellis account for $391.20, and to hand you herewith a letter from our Purchasing Agent, Mr. A. L. Ogilvie, in which he states that he did not call for tenders for the purchase of these envelopes, though quotations were received, as stated in his letter of November 3 addressed to the Chairman, and which I sent you with my letter of the 5th instant.

With reference to the return by Mr. Ogilvie of Messrs. Barber & Ellis' cheque for $87.05, I am to say that this was done by Mr. Ogilvie on his own responsibility, and without the knowledge of the Commissioners—doubtless with the object of saving bookkeeping.

I have, &c.,

The Auditor General. P. E. RYAN, *Secretary.*

OTTAWA, November 12, 1906.

SIR,—In reply to your favour of November 10, I beg to refer you to my letter, dated November 3, addressed to the Hon. S. N. Parent, Chairman of the Transcontinental Railway Commission, which gives a review of the manner in which this purchase was made.

I did not call for tenders for the purchase of these envelopes, though quotations were received as stated in my letter, dated November 3, addressed to the chairman.

Yours truly,

The Secretary, N.T. Ry. Comm. A. L. OGILVIE, *Gen. Purchasing Agt.*

Transcontinental Railway: Printing and Legal Services.

AUDIT OFFICE, OTTAWA, January 10, 1906.

SIR,—I would respectfully call your attention to section 5, chap. 50 of 3 Edward VII., respecting the Department of Public Printing and Stationery, which provides that all accounts for printing shall, before being paid, be examined and certified by the King's Printer, also to an Order in Council of April 12, 1879, which states that all legal accounts should be submitted to the Department of Justice for examination and approval before payment.

I have therefore to request that in future all printing, advertising and legal services accounts be dealt with in accordance with the above regulations, otherwise I shall be unable to accept the vouchers for payment of the same.

I am, sir, your obedient servant,

The Chairman, N.T. Ry. J. FRASER, *A.G.*

TRANSCONTINENTAL RAILWAY, OTTAWA, January 11, 1906.

SIR,—I am directed to acknowledge receipt of your favour of the 10th inst., addressed to the chairman in regard to the above matter.

The view which we have been governed by up to the present time is that we are acting under the authority of special legislation, viz., 3 Edward VII., chap. 71, being 'An Act respecting the construction of the National Transcontinental Railway,' as amended by 4 Edward VII., chap. 24, 'An Act to amend the National Transcontinental Railway Act,' and as there is nothing contained in either of these Acts which would indicate that we are subject to any legislation passed by parliament respecting the permanent departments of the government, we have always felt at liberty to arrange for our printing, supplies and legal services in a way to best suit our special requirements and the public service, except as limited by the provisions of the said Acts.

By direction of the chairman, however, I am forwarding a copy of your letter to the Minister of Justice, with the request that he be good enough to advise us as to the point which you raise. Should his advice be that we are subject to the statute and the Order in Council to which you refer, we shall, of course, endeavour, for the future, to conform with their requirements. Otherwise, I presume, it will be quite satisfactory to you if we proceed as in the past.

Your very truly,

The Auditor General. P. E. RYAN, *Secretary.*

AUDIT OFFICE, OTTAWA, November 16, 1906.

SIR,—In a letter of January 11, 1906, you expressed the Commission's intention of asking a ruling from the Department of Justice as to the necessity of submitting accounts for legal services for taxation by the Department.

Will you kindly favour me with a copy of whatever answer you may have received?

I am, sir, your obedient servant,

The Secretary, N.T. Ry. Com. J. FRASER, *A.G.*

Re Halifax Freight.

AUDIT OFFICE, OTTAWA, May 7, 1906.

SIR,—The agent at Halifax takes credit on his monthly account for goods delivered without collection of charges, and goods billed out prepaid and not collected. For the month of December last these amounts were respectively $471.86 and $57.14. Details are given and opposite some of the items is marked 'since cleared.'

You were written to on March 30, 1904, in reference to this practice, but no explanation seems to have been furnished.

I am, sir, your obedient servant,

The General Manager, Govt. Railways. J. FRASER, *A.G.*

Re Outstandings, Trenton.

AUDIT OFFICE, OTTAWA, February 13, 1906.

SIR,—I find on Form 17, for October last an item in the outstandings of car rental of $774, at Trenton, dated June 29, 1904. A memo. opposite reads, 'refused by N.S.S.C. Co.'

Please let me know what action has been taken in reference thereto.

I am, sir, your obedient servant,

The General Manager, Govt. Railways. J. FRASER, *A.G.*

Re Open Accounts—Stations.

AUDIT OFFICE, OTTAWA, February 15, 1906.

SIR,—In the balance sheet for June 30 last the amount entered to debit of stations, is $204,979.20. Of this amount $75,372.93 is for suspense.

I would like to have a detailed statement of this account, and such explanations in reference thereto as you are able to give.

I am, sir, your obedient servant,

The General Manager, Govt. Railways. J. FRASER, *A.G.*

MONCTON, N.B., April 26, 1906.

DEAR SIR,—In answer to your letter, dated February 15, asking for a detailed statement of the amount $75,372.93, shown in the balance sheet for June 30 last to debit of stations in suspense account, with explanations.

I send you herewith a letter from Mr. Williams, chief accountant and treasurer, dated April 20, inclosing a detailed statement from the traffic auditor of the items in suspense account ; also a letter from Mr. Cameron, freight claim agent, addressed to Mr. Bruce, traffic auditor, stating that it would entail a great deal of labour to give an explanation in regard to each item, that it could not be done for some considerable time on account of many of the papers being in the hands of connecting roads, and that it would retard very materially the work of reducing the suspense account.

Under the circumstances, if you still wish for an explanation with respect to each item, and will let me hear from you in that regard, I will give the necessary instructions and have it furnished.

Yours truly,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

MONCTON, N.B., April 18, 1906.

DEAR SIR,—Referring to your letter of the 10th inst. and the inclosed statement of the claims suspense account, these outstanding result from agents not being able, from one cause or another, to collect the full charges billed on them, from the consignees. Below I give a few of the principal causes :

1. We have export rates on some commodities, these being lower than the regular rates. The agent at destination is billed with the latter and on proof of export reduces charges to the export rate, the difference being placed in suspense until authority is received from connecting roads to debit them with their proportion.

2. Freight for use of I.C.R. is billed by connecting roads at the regular rates. The charges are placed in suspense until such time as they are verified by the different departments.

3. Overcharges in weight and rate.

4. Errors in addition and calculation.

5. Errors in routing, causing charges at destination to be in excess of the tariff.

6. Billing on wrong destination.

7. Charges on goods lost or destroyed in transit.

There are various other causes. The customs frequently sell goods and do not realize enough to pay our charges.

The suspense account was swollen considerably last year on account of hay for Nova Scotia farmers being carried free by Order in Council, owing to a severe drought. This entailed a vast amount of extra work in the Freight Claim Office, and as no additional help was furnished the work became conjested. It has been our policy to give claims from patrons of the road the preference, especially in cases where they control competitive freight. An addition to the Freight Claim staff has recently been made and we are now in a position to devote more time to outstandings. The account will soon be materially reduced.

It would entail a great deal of labour to give an explanation in regard to each item. We could not do so for some time as many files of papers are in the hands of connecting roads. I trust it will not be necessary for us to give explanations in detail, as this will retard the work of reducing the suspense account.

Yours truly,

O. CAMERON,
Freight Claim Agent.

AUDIT OFFICE, OTTAWA, May, 5, 1906.

SIR,—I am returning herewith the detailed statement of the Suspense Account, as shown in the balance sheet of June 30, 1905, received yesterday with your letter of April 26.

If not too much trouble, I would like to have the date when each item was filed and such as have since been adjusted marked so.

In view of the difficulty of giving an explanation of each item, and that it would materially retard the work of reducing the account, I will be satisfied with the general explanation given in Mr. Cameron's letter.

I am, sir, your obedient servant,

The General Manager, Govt. Railways. J. FRASER, *A.G.*

MONCTON, N.B., July 9, 1906.

DEAR SIR,—In answer to your letter, dated May 5, I return herewith the detailed statement of the Suspense Account, and send a letter from Mr. Williams, treasurer, dated May 31, and the notations asked for in your letter have been made upon the return.

The Auditor General. D. POTTINGER, *Gen. Mgr.*

MONCTON, N.B., May 31, 1906.

DEAR SIR,— Your D2/11970 of the 7th instant, returning statement showing details of Claims Suspense Account at June 30, 1905, and requesting that items which have been cleared have the date put against same. I return the statement herewith, and the items have been marked accordingly.

Mr. Cameron in letter dated 29th instant makes the following explanations with respect to this statement :—

'Referring to the inclosed statement, and conversation in regard to the Relief Claims Suspense Account, there is no reason to doubt but that all the items in the account are legitimate. As you are aware, it is frequently necessary to refer station relief claims to our agents and connecting roads after the amount has been transferred to Suspense Account. We were not in a position, on account of being short-handed, to follow up each item. As explained in a previous letter, we gave the preference to claims from the public, as many of them control competitive business, and would probably withdraw it from the Intercolonial if they were irritated to any extent by delay in having their claims settled.

'I may say that since July 1, 1905, we transferred to the Suspense Account 3,975 station relief claims ,amounting to $76,092.98. The total of the Suspense Account on April 30 was $63,908.59, as against $75,372.93 on June 30, a reduction of $11,464.34.

'We have been making every effort to reduce the Suspense Account, and with this end in view we cleared a large number of the more recent relief claims for the reason that they can be handled much more expeditiously than the old claims. With the staff increased we are taking up the old items seriatum, and there is every prospect of substantial reductions being made in the Suspense Account each month.'

Auditor General's letter returned herewith.

Yours truly,

T. WILLIAMS, *Chf. Acct. & Treas.*

AUDIT OFFICE, OTTAWA, April 6, 1906.

SIR,—I notice on the statement of 'Other Receipts' attached to the cashier's daily statement, No. 1905, of March 31 last, a payment by M. Lodge of $5,000. Please let me know the nature of this entry at your early convenience.

I am, sir, your obedient servant,

To General Manager, Govt. Railways. J. FRASER, *A.G.*

MONCTON, N.B., April 14, 1906.

DEAR SIR,—In answer to your letter of April 6 inquiring in regard to a payment of $5,000 made by M. Lodge on March 31 last, I inclose you a letter from Mr. Williams, dated April 11, stating that this amount credited to Mr. Lodge was an amount received from Sessenwein Brothers on account of steel scrap sold to M. Lodge and by him trans-

ferred to them. This sale was made by the department at Ottawa. I received a telegram on February 15 from the secretary of the department as follows :—

'I am directed to say you may deliver to Matthew Lodge, Moncton, N.B., 1,500 tons of scrap steel rails, four feet and up, at $10.20 per ton.'

On February 19 I received a telegram from Mr. Butler as follows :—

'Please consign steel scrap authorized to be sold to Lodge to Sessenwein Brothers, Sydney, N.S.'

Yours truly,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Defalcations.**

AUDIT OFFICE, OTTAWA, February 15, 1906.

SIR,—The defalcations of the former agents at St. Hyacinthe and Dartmouth are still retained in the monthly accounts of the present agent.

Would it not be advisable to relieve them of these amounts ?

Was any action taken against the estate of the agent at St. Hyacinthe or his sureties ?

I am, sir, your obedient servant,

The General Manager, Govt. Railways. J. FRASER, *A.G.*

MONCTON, N.B., February 26, 1906.

SIR,—I have received your letter, dated February 15, and have given instructions to the treasurer to transfer the balance of the defalcation of W. Nicholls, late joint agent at St. Hyacinthe, from the station books to the general ledger of the railway.

I have also given similar instructions in regard to the defalcation of W. Stevens, the former agent at Dartmouth.

In answer to your question, 'Was any action taken against the estate of the agent at St. Hyacinthe or his sureties ?'

The shortage of Nicholls amounted to $8,876.05. He was guaranteed under agreement with the Grand Trunk Railway as joint agent at St. Hyacinthe, in the Guarantee Company of North America for $1,500, the premium on this policy being paid by the Grand Trunk, and the Intercolonial repaying the latter one-half of same. When the shortage was discovered the treasurer of the Intercolonial notified the treasurer of the Grand Trunk of the shortage, and requested that a claim be made on the Guarantee Company for the amount of the policy. The defalcation of Nicholls was reported to the Railway Department, but I am unable to say what action was taken.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Defalcation at St. Hyacinthe.**

AUDIT OFFICE, OTTAWA, March 7, 1906.

SIR,—The general manager of the Intercolonial Railway writes as follows :—

'In answer to your question, was any action taken against the estate of the agent at St. Hyacinthe or his sureties ? The shortage of Nicholls amounted to $8,876.05. He was guaranteed under agreement with the Grand Trunk Railway as joint agent at St. Hyacinthe, in the Guarantee Company of North America for $1,500, the premium on

this policy being paid by the Grand Trunk, and the Intercolonial repaying the latter one-half of same. When the shortage was discovered the treasurer of the Intercolonial notified the treasurer of the Grand Trunk of the shortage, and requested that a claim be made on the Guarantee Company for the amount of the policy. The defalcation of Nicholls was reported to the Railway Department, but I am unable to say what action was taken.'

Please let me know what action has been taken to secure for the Intercolonial its share of the policy of the Guarantee Company.

I would also ask if any action has been taken against the agent or his estate to recover the balance of the defalcation.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

Re **Canal Revenue.**

AUDIT OFFICE, OTTAWA, February 5, 1906.

SIR,—I have received your letter of 20th ultimo explaining the reductions in wharfage and storage receipts at the port of Montreal.

In my letter of September 9 attention was called to the absence of any harbour dues having been collected in 1904-5, You have made no reference to this point in your reply.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, February 21, 1906.

SIR,—I have the honour to acknowledge the receipt of your communication of the 5th instant, in which, in connection with the departmental letter addressed to you on the 20th ultimo, relative to the reduction in wharfage and storage receipts at the port of Montreal, you state that, in the letter addressed by you to the department on September 9 last, attention was called to the absence of harbour dues having been collected in 1904-5, but that no reference is made to this in the above mentioned departmental letter.

In reply, I am directed to say that the words 'harbour and' were omitted from the seventh line of the departmental letter in question, and that it should have read 'harbour and wharfage dues.'

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

The Omission of Moville as a port of call on Canada and Great Britain Service.

AUDITOR GENERAL'S OFFICE, OTTAWA, March 6, 1906.

SIR,—With reference to your application of a recent date for a cheque of $43,751.33 in favour of Messrs. H. & A. Allan, being the amount of their claim for steamship subsidy between Canada and Great Britain for the quarter ended December 31, 1905, less $17,082.33, deducted by the department on account of certain of the steamers not having called at Moville on the trips eastward and also on acount of certain other steamers failing to maintain the necessary average speed, I should like to have such information as you have been able to procure in regard to the effect on the delivery of the mails in Great Britain and Ireland of the omission of the calls at Moville. It seems to me as the contract bases payment on a round trip fully performed, that such an infraction as the omission to call at Moville where, I understand, all mails are disembarked so as to facilitate their delivery throughout the United Kingdom, deprives the contractors of any claim to even a portion of the amount agreed to be paid for a round trip fully performed.

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Trade and Commerce.

DEPARTMENT OF TRADE AND COMMERCE, OTTAWA, March 6, 1906.

SIR,—I have yours of even date in *re* subsidy for mail service between Canada and Great Britain; and note your query as to the effect on the delivery of the mails in Great Britain and Ireland in consequence of the omission of call at Moville.

In reply to this I beg to state that the department has received no specific complaint, but that the question has been asked the postal authorities; and they have replied to effect that they would have to communicate with the General Post Office in London before they could give any answer to the inquiry. I cannot, therefore, give a specific answer to your inquiry until advices are received from London through the Post Office Department here. Apparently the call at Moville was instituted something like fifty years ago and has been continued ever since. What effect the change in circumstances in that time may have on the then necessity for the call at Moville is a pertinent question difficult to answer.

I have the honour to be, sir, your obedient servant,

W. G. PARMELEE, *D.M.*

The Auditor General.

AUDITOR GENERAL'S OFFICE, Ottawa, May 11, 1906.

SIR,—I have the honour to acknowledge the receipt of your application of the 8th inst., for a cheque of $15,914, equal to £3,270 sterling, in favour of Messrs. H. & A. Allan, contractors for the ocean mail service between Canada and Great Britain, being the amount deducted from previous subsidy claims, for the reason that the voyages respecting which the deductions were made, were not performed in accordance with the contract. Under the contract the steamers performing this service are required to call at Moville, Ireland, on all voyages east and west in the interest, as I understand the contract, of a more prompt and satisfactory mail service between the two countries than would be afforded were the mails received and delivered at Liverpool. The omission of the calls at Moville, which is the chief reason for the deductions that have been made, is, to my mind, in view of its importance in this respect, a violation of the contract provisions sufficiently grave to call for either a modification of the contract or a refusal of the subsidy in so far as the defective voyages are concerned.

The contract, I presume, was entered into in the first instance, under the authority of the Governor in Council, and it seems to me a like authority is necessary to modify its provisions in the contractors' favour.

If you will therefore submit the case to Council and obtain the necessary modification, I shall pass your application. In the meantime I do not feel that I am in a position to deal with it otherwise.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

NOTE.—The necessary Order in Council was passed May 18, 1905.

J. F.

Canada and Mexico Service.

AUDITOR GENERA'S OFFICE, OTTAWA, November 6, 1906.

SIR,—I beg to acknowledge the receipt of your application for a cheque of $16,-666.67 in favour of the Elder-Dempster Company, contractors for the steamship service between Canada and Mexico, being a claim for two round trips sailed during the months of July and August last.

The contract under which this claim is made provides for quarterly payments of $25,000 each, and it seems to me that it would be more in accordance with the terms of the contract to await application for payment until full particulars of the service for the quarter ended September 30. had been received at the department.

I notice under clause 6 of the contract, that the company is obliged to furnish the Minister with time-tables, showing the proposed sailings, for his approval; and as the amount of subsidy may be affected by non-adherence to the dates of sailings thus approved by the Minister, it is necessary that one of these time-tables should be sent me. Has the Government of Mexico contributed to this service?

I am, sir, your obedient servant,

J. FRASER, *A.G.*

The Deputy Minister of Trade and Commerce.

DEPT. OF TRADE AND COMMERCE, OTTAWA, November 7, 1905.

SIR,—I have yours of yesterday's date in *re* the application made for a cheque in favour of the Elder-Dempster Company for steamship services between Canada and Mexico ; and note what you state with reference to quarterly payments.

The claim as it came here was for quarterly payment; but there were two of the trips which were not covered by the proper certificates of entrance and clearance at the foreign ports. We therefore held them over waiting until the evidence could be furnished and sent along the other two as the company claims to be in need of funds to meet expenses of the line. Under the circumstances, I hope you will pay the complete claims; and as soon as we get evidence in support of the others, they will be forwarded along with an additional claim.

I do not wish to send in these claims until they are absolutely in order for if we let up on one of them they will claim it as a precedent, and the evidence from the foreign ports will come stringing along as they do from South Africa instead of coming with the claims themselves, as they should.

With reference to time-tables, I am not aware that any have been prepared. The sailings are advertised in the Montreal papers sufficient time in advance, and are usually about the 20th of the month. The vessel for the current month is booked to sail on the 20th. It is impossible for a line of this kind to adhere strictly to sailing dates. It is very different, for instance, from the mail line that must sail with the mails on a given date. Lines of this kind carry no mails, and they must necessarily wait for cargo, as it would never do to leave a port on a given date when it was known that there was considerable additional cargo on the way that would be ready within a day or two, and for this reason considerable latitude is allowed to lines of the kind.

With reference to your inquiry as to whether the government of Mexico has contributed to the service, I cannot give you any positive assurance, although I am told by the company that they have made arrangements with the Mexican government for payment of a certain sum, and the understanding is that all such payments shall be handed over to this department to be deposited to the credit of the service, so that if any money eventually comes from Mexico, it will be applied in rebate of what we pay.

I have the honour to be, sir, your obedient servant,

W. G. PARMELEE, *D.M.*

AUDITOR GENERAL'S OFFICE, OTTAWA, November 9, 1905.

SIR,—I have the honour to acknowledge the receipt of your letter of the 7th inst. in explanation of your application of the 3rd November for a cheque of $16,666.67 in favour of the Elder-Dempster Company for steamship service between Canada and Mexico.

In view of this explanation and the fact that the service for the quarter seems to have been fully performed, I have passed your application for the part payment asked for. It seems to me though, that the contract calls for a time-table of regular sailings which should be adhered to except in cases where the consent of the department has been obtained for good reasons given by the company.

I hope you will take steps to find out if the government of Mexico has made any provision for affording aid to this service, and in case such aid is to be given that you will have the payments made direct to the Receiver-General of Canada by the Mexican government.

As you are aware, it is in this way that Canada pays her share of the subsidy paid the Canadian Pacific Railway by the Imperial government for the service between Canada and Japan.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

The government of Mexico contributed $22,595.20 which has been credited to the appropriation.
